

Spring 2019 Product Release Information

Product:	CORESense Application Software
Release Number:	Versions 5.15, 7.4 and higher
Release Dates:	Release Date: March 12, 2019 Current Release Type: Beta 2(Caroline) General Release: April 30, 2019
Also Includes Items from Release(s):	Beta 1, RC1

What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

Enhancement: **SS-2818: TaxJar Update**

Version: 7.4, 5.15

System Path: TaxJar

Description: Added a new tax code option, "Taxable" to TaxJar. When selected, this tax code gets filtered out during the API request.

Enhancement: **SS-2805: Advanced Personalization Update**

Version: 7.4

System Path: Advanced Personalizations

Description: Updated website personalizations to no longer use the 'flat text' wording. It will show 'per character' if the price type is set to 'Character'; otherwise it shows nothing, even if 'Flat' is selected for price type.

Enhancement: **SS-2796: Model Stock Update**

Version: 7.4

System Path: Product Manager > Model Stock

Description: Updated the 'Locations' multi-select to show all locations without additional filtering by whether the warehouse was available for fulfillment.

Enhancement: **SS-2777: Inventory Report Builder Update**

Version: 7.4

System Path: Inventory Report Builder

Description: Updated the Inventory Report Builder's 'Default Location' field to display as its inventory breadcrumb (Aisle / Rack/ Shelf).

Enhancement: **SS-2774: Deal Manager Product Criteria**

Version: 7.4

System Path: Deal Manager

Description: Update Product Criteria so that if a product is manually added via the 'product criteria' and needs to switch from include to exclude, the product can be deleted from deal and not just moved to the Exclude state.

Enhancement: **PS-5382: Club Membership Update**

Version: 7.4

System Path: Club Membership

Description: Updated get_balance() calls inside club membership to be get_balance(true), where the true parameter returns due balance only.

Enhancement: **PS-5389: Connect POS Duplicate Button**

Version: 7.4

System Path: Connect POS

Description: Removed duplicate Pickup button on Connect POS for an order.

Enhancement: **PS-5378: Connect POS Customer Search**

Version: 7.4

System Path: Connect POS

Description: Fixed issue with customer search not working after performing a pickup at the POS.

Enhancement: **PS-5377: Connect POS Pickup Order**

Version: 7.4

System Path: Connect POS

Description: Updated the Pickup Order Receipt so that it displays the Order # being picked up, as well as the items that were picked up.

Enhancement: **PS-5375: Warehouse Location Update**

Version: 7.4

System Path: Warehouse Locations

Description: Updated `get_location_breadcrumb()` method on Warehouse Location entity to support passing in the separator between breadcrumb elements, which defaults to `' / '` for backward compatibility.

Enhancement: **PS-5372: Club Delivery Deals**

Version: 7.4

System Path: Deal Manager

Description: Updated deal logic (order entity and order item entity) to allow deals on clubs that are per delivery clubs with an unlimited duration.

Enhancement: **PS-5311: Club Delivery Deal Pricing**

Version: 7.4

System Path: Deal Manager

Description: Updated clubs so that per delivery clubs can be setup with an Unlimited duration. These type of clubs will use the current pricing with deals applying.

Enhancement: **PS-5235: Braintree Integration**

Version: 7.4

System Path: Payment Processors

Description: Integrated Braintree Direct (payment gateway and processor) on the website, SOI and Back Office.

Enhancement: **PD-1789: Shipping Methods Label**

Version: 7.4

System Path: Shipping Methods

Description: Fixed issue with the duplicate label check in the Shipping Methods Manager.

Enhancement: PD-1783: **Connect POS Value Card Pin**

Version: 7.4

System Path: Connect POS

Description: Updated Connect POS, when buying a new value card or adding funds to an existing value card, it needs a pin to confirm, if the 'Activate Value Card PIN' is turned on.

Enhancement: PD-1782: **Avalara Orders**

Version: 7.4

System Path: Avalara

Description: Added new permission 'Order Manager - Unlock Avalara Orders' to allow users to unlock Avalara orders. NOTE: Anything done to the order after unlocking won't update Avalara.

Enhancement: PD-1778: **Connect POS Comments**

Version: 7.4

System Path: Connect POS

Description: Added Order Comments to Connect POS Returns / Exchanges.

Bug List

The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-16655	Fixed issue with encryption that was causing FTP data upload failure.
BUG-16640	Fixed issue with PO Queue reordering cron.
BUG-16639	Updated recurring order generation to correctly reserve inventory for the order created.

BUG-16637	Removed the "forced" image sizing from SOI images.
BUG-16634	Fixed issue with faceted filters value sorting sequence.
BUG-16629	Updated the caching of the shipping options to not be setting if we're limiting the search for a single shipping method.
BUG-16627	Fixed issue with the shipping price adjustment not working for a send sale order on the POS and SOI.
BUG-16622	Fixed issue with data feed import that wasn't recognizing vendor SKUs alphanumeric combinations.
BUG-16621	Fixed issue with Report Center queue timing.
BUG-16619	Fixed issue with 5.15 transfer quantity allocation.
BUG-16617	Fixed issue with eBay orders having deal calculations applied to orders.
BUG-16616	Fixed issue with Classic POS menu options not displaying on screen.
BUG-16613	Fixed issue with Shippo not working after release of Beta1.
BUG-16610	Added the error message 'Unable to return value card without customer.' to display when attempting to return a value card without an associated customer.
BUG-16605	Updated the Product Manager so that it won't update the product information when just trying to update the product's SKU shipping drivers.
BUG-16596	Fixed issue with Connect POS line item warning display not working.
BUG-16595	Updated our Tempus integration to send 'SHOWCARDEXP' in the request so that CCEXP is always found in the response.
BUG-16591	Fixed issue with deals being inaccurately applied when creating new customers in Connect POS.
BUG-16589	Updated Connect POS to disregard the balance due when attempting to complete a return on open orders.
BUG-16587	Fixed issue with non-custom fields updates not working with locked orders.
BUG-16583	Fixed issue with auto-reorder process inclusion of voided and closed transfers.
BUG-16582	Updated the ship_* template tags to use the ship-to that contains actual shipments, as opposed to the ship-to that is for take now items.
BUG-16581	Updated 'Avg Cost Ea.' to have the same calculation as 'Avg. Each' in 5.15.
BUG-16576	Fixed issue where order comments were displaying line break markers.

BUG-16574	Updated the Connect POS Returns to do the same calculation as the Return Wizard does for layaways in progress.
BUG-16573	Fixed issue with PO distribution generating blank transfers.
BUG-16572	Fixed issue with Connect POS returns to debit payment type should process through Tempus.
BUG-16571	Upgraded the code so you can comfortably add and remove 300000 of inventory from the inventory manager.
BUG-16545	Added "Default Address Classification" system setting for Shippo shipping.
BUG-16208	Fixed issue with Connect POS so that when adding a new customer during the exchange process, no balance due occurs.
