

Spring 2018 Product Release Information

Product:	CORESense Application Software
Release Number:	Versions 5.15, 7.4 and higher
Release Dates:	Release Date: March 13, 2018 Current Release Type: B 2 (Congress) General Release: April 24, 2018
Also Includes Items from Release(s):	Beta 1, RC 1

What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

Enhancement: **SS-2393: Deal Name Search in Order Manager**

Version: 7.4

System Path: Order Manager

Description: Updated Order Manager searching for 'Deal Name' to be able to do LIKE instead of an exact match.

Enhancement: **SS-2383: Personalizations Price Display**

Version: 7.4

System Path: Personalizations

Description: Updated the SOI and Website, in regards to order item personalizations and if the system setting 'Personalizations Display' is 'per order item', to display the total personalization price being added instead of the unit price.

Enhancement: **SS-2374: Shipment Date**

Version: 7.4

System Path: Shipment Manager

Description: Updated saving a shipment to set the ship date to the current date/time if the ship date is empty.

Enhancement: **SS-2372: Value Cards Report**

Version: 7.4

System Path: Reporting

Description: Added (csv) export capability to the Value Cards Report.

Enhancement: **PS-5056: Quick Entry Form**

Version: 7.4

System Path: SOI

Description: Provided the ability to turn the Quick Item Entry module in the SOI off. Contact CORESense Support to request form be turned off.

Enhancement: **PS-5052: SOI Pricing Display**

Version: 7.4

System Path: SOI

Description: Enhanced the SOI product information section to display tiered pricing information for a product if it exists.

Enhancement: **PS-5040: Connect POS Receipt Display**

Version: 7.4

System Path: Connect POS

Description: Added the ability for line item (order_item) custom fields to print on the receipt right under each line item.

Enhancement: **PS-5027: Website Login**

Version: 7.4

System Path: Website

Description: Updated website login process to automatically log the user in on the website after they create their account.

Enhancement: **PS-4932: Print Fedex Return Label with Shipping Label**

Version: 7.4

System Path: Shipment Manager > FedEx Label Printing

Description: Added a checkbox (Print Returns Label) to the FedEx ship confirmation screen. If checked, a returns label will be printed in addition to a regular label. There are 3 new system settings in System Settings Manager => Shipping => Defaults => FedEx:

- FedEx Returns Label Phone Number
- FedEx Returns Label Service Type
- FedEx Default to Print Returns Label

Enhancement: PD-1635: **Inventory Report Builder Reorder Fields**

Version: 7.4

System Path: Inventory Report Builder

Description: Updated the Inventory Report Builder so that the following fields are on the same 'line' as their warehouse counterparts, if available:

- Reorder Type
- Reorder Point
- Reorder Quantity
- Recommended Order Quantity

Enhancement: PD-1631: **Connect Apply Payment Option**

Version: 7.4

System Path: Connect POS

Description: Added 'Apply Payment' button to Order Search results on Connect POS.

Enhancement: PD-1628: **USP Shipping Methods**

Version: 7.4

System Path: Shipping Methods

Description: Updated USPS Carrier Shipping Methods so that all are available from new USPS API.

Enhancement: PD-1625: **Personalization Editing**

Version: 7.4

System Path: Product Manager > Personalization

Description: Updated the 'Edit Preconfigured Value' value box to be text area for easy editing.

Enhancement: PD-1623: **Connect POS Search Results**

Version: 7.4

System Path: Connect POS

Description: Updated Connect POS product / customer searching to not clear your results at the end and merely provide a helpful 'No more results.' message.

Enhancement: PD-1498: **Connect POS Tokens**

Version: 7.4

System Path: Connect POS

Description: Fix token retrieval on Connect POS so that re-entry of token is minimized.

Bug List

The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-15616	Fixed issue with recurring order reminder emails not being delivered consistently.
BUG-15603	Updated order level discount rounding calculation for Grand Totals.
BUG-15593	Updated Orders Reports to take in to consideration channel criteria and the Order Status criteria.
BUG-15591	Corrected issue with EDI messages not moving outgoing messaging from the In to the Out folder.
BUG-15589	Fixed issue with Classic POS send sales losing customer contact information when passed to the Back Office.
BUG-15587	Fixed issue with Classic POS SQL errors.
BUG-15582	Updated how the report center submits reports so that it can handle big filters.
BUG-15571	Updated the Shipment Manager to filter out blank results for the shipping method.

BUG-15568	Fixed issue with multiple level deals not all being applied.
BUG-15566	Fixed issue with website drop-down lists not displaying "Choose..." as the default.
BUG-15565	Fixed Classic POS issue with gift certificates displaying on POS orders.
BUG-15558	Fixed issue with Tempus payment processor not managing recurring orders accurately and assigning AVS Holds.
BUG-15557	Updated location picker to work with Report Center.
BUG-15556	Fixed the merchandise hierarchy field in Inventory Report Builder to not clear out the previous results on each iteration.
BUG-15555	Fixed issue with Deals not displaying on product page configurations.
BUG-15553	Fixed issue with IHA order returns creating an extra blank payment record, which affected the Datamart ETL.
BUG-15552	Fixed issue with products losing their merchandise hierarchy association.
BUG-15551	Updated Report Center to include merchandise hierarchy filter in the Inventory Report Builder.
BUG-15547	Fixed issue with blank address 2 field in Warehouse Manager that was duplicating address1 field in the blank field.
BUG-15546	Fixed issue with POS order not displaying COGS.
BUG-15544	Fixed issue with search capability for product type fields in Product Manager.
BUG-15541	Fixed issue with Report Center results for fields with links that were not working.
BUG-15537	Fixed issue with Order Exception report not filtering on selected order statuses.
BUG-15536	Fixed issue with PO receiving into the selected location upon receiving of the SKU.
BUG-15533	Updated the code to only check if the product has been sold if adding new base inventory; but does allow new standards/upgrades inventory requirements to be added.
BUG-15532	Updated eWallet so that it can be used for recurring orders.
BUG-15528	Fixed issue with two item-level deals being applied to the same order item.
BUG-15525	Fixed issue with Customer custom field through the Back Office Config Tool, so that if an apostrophe is used in the description, the insert into info fields does not fail.
BUG-15521	Updated the Product Manager so that, if you're accessing it from a POS, it will not allow the image to be clickable.
BUG-15520	Fixed issue with Amazon that when the inventory level goes to 0, that an update is sent to Amazon.
BUG-15482	Added logic to the Connect POS Cart Checkout API that checks to see if the order is On Account Order, and if so, it will not put it into the Ready to Process status if all items were taken now.

BUG-15463	Updated the shipment box editor to set the shipment's destination id if it's 0 and the shipment is for an order. Back-tracks through inventory to the order item to the order shipping detail. Destination id will match the order shipping detail's shipping contact.
BUG-15462	Updated Oversale function to calculate total quantity based off of product. So oversale is based off total product quantity in cart, not order item quantity. Updated split item code to set the oversale variable for the old and new product. Updated removing an item to reset those items of the same product id of the one removed, so that it'll update the oversale variable for current items in the cart.
BUG-15461	Added a check when manually fulfilling to check how much is supposed to be fulfilled in total against what is already fulfilled and throw an error if any in the batch are already fulfilled. "ERROR: You cannot fulfill at least one of the order items when it is already fulfilled. Please close the window and try again."
BUG-15460	Fixed an issue where the ship date was getting set incorrectly to the beginning of time. This is for SixBit only.
BUG-15457	Fixed issue in Connect POS when updating cart item quantity so that it does not display the item as oversale unless it is oversold AND the pos is set up to display the oversale.
BUG-15445	Fixed issue when editing a pre-configured value for a product personalization, the update was not saved.
BUG-15433	Updated Recurring Order Deal Calculation to, if using order item level deal, to check that the order item has a recurring order schedule set and not just any product in your cart.
BUG-15430	Updated code so that any contact updated anywhere will update their related recurring orders as well.
BUG-15428	Fixed logging in to the back office to work correctly with IE and decrypting.
BUG-15420	Updated Connect POS Layaway Orders to be able to correctly take Value Cards, Gift Certificates, Customer Credit and Loyalty Reward as payments.
BUG-15411	Fixed issue with product image upload not recognizing image files that included spaces in the file name.
BUG-15406	Fixed issue with "private" comments printing on sales receipt.
BUG-15386	Updated Connect POS the javascript to be able to format the number entry with a comma.
BUG-15385	Updated the Connect POS order creation code to set a date if it's empty.
BUG-15292	Fixed issue with delayed delivery not recognizing entry of zero days.
BUG-15255	Updated the part of the Tempus payment processor that returns the error message to return the CCNONAUTHRESP if CCNONAUTHRESP is 'INCORRECT PIN' and TRANRESPMESSAGE is 'RECEIPT GENERATED'.
