

Summer 2018 Product Release Information

Product:	CORESense Application Software
Release Number:	Versions 5.15, 7.4 and higher
Release Dates:	Release Date: June 19, 2018 Current Release Type: Beta 2(Empire) General Release: July 31, 2018
Also Includes Items from Release(s):	Beta 1, RC1

What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

Enhancement: **SS-2535: Google Analytics IP Anonymization**

Version: 7.4

System Path: Google Analytics

Description: Added the code necessary to do send optional 'IP Anonymization' to Google Analytics. Note that this is for Google Analytics Universal only.

Enhancement: **SS-2529: Salesman Sorting**

Version: 7.4

System Path: Reporting > Sales Report Builder

Description: Added the ability to sort by 'Salesman' (order level) in the Sales Report Builder.

Enhancement: **SS-2514: Scheduled Reports**

Version: 7.4

System Path: Reporting > Report Builders

Description: Updated the Scheduled Report cron to set the start / finish dates to be yesterday if the scheduled time is '00:00:00' or '24:00:00' to enable reporting for a full day.

Enhancement: **SS-2512: Gift Certificate Import Check**

Version: 7.4

System Path: Data Import

Description: Updated Gift Certificates import to do check for truncated data.

Enhancement: **SS-2498: Product Type Drop-down**

Version: 7.4

System Path: Inventory Report Builder

Description: Increased the allowed length of product types for the Inventory Report Builder drop-down so that the product type labels are not cut off.

Enhancement: **PS-5176: Customer Manager Column**

Version: 7.4

System Path: Customer Manager

Description: Added the ability to show a "Most Recent Order Date" column to the Customer Manager search results

Enhancement: **PS-5147: Value Card Data Feed**

Version: 7.4

System Path: Data Feed Manager

Description: Created a new data feed, that if run as scheduled, generates a file matching the Value Card Transactions report from the Report Center for the previous day's value card transactions. If run as triggered, the user is able to enter in a date.

Enhancement: **PD-1673: Connect POS Back Office Access**

Version: 7.4

System Path: Connect POS

Description: Updated the Connect POS to check the permission 'POS - Back Office Access' before allowing you access to the Back Office from the Connect POS.

Enhancement: **PD-1672: Connect POS Check Field**

Version: 7.4

System Path: Connect POS

Description: Updated Connect POS to display the following error if you try to apply a check payment type and put anything but numbers in the check number field: "Check Number must be all numbers."

Enhancement: **PD-1671: Connect POS Receivable Setting**

Version: 7.4

System Path: Connect POS

Description: Added the following warning in the POS Replication Manager to display if the 'customerCreditReceivableTypeId' setting set has not been set:

"The "customerCreditReceivableTypeId" setting has not been defined for this terminal. This needs to be done before taking orders that use Customer Credits."

Enhancement: **PD-1670: Reordering Points Warning**

Version: 7.4

System Path: Inventory Manager > Reordering

Description: Added the following warning if a SKU's default shipping method ID is not set:

"WARNING: Auto-Reorder process for the PO Queue will not work until a default shipping method is set!"

Enhancement: **PD-1669: Report Search Criteria Display**

Version: 7.4

System Path: Report Center

Description: Added the display of selected Search Criteria to the top of Report Center reports when viewing them.

Enhancement: **PD-1666: Loyalty Rate Updates**

Version: 7.4

System Path: Loyalty Program

Description: Updated the Loyalty Program so that changing the Retail Rate for Loyalty does not change the value of the existing rewards, it only affects the value of new rewards created after the system setting is changed.

Enhancement: **PD-1661: Report Center Additions**

Version: 7.4

System Path: Report Center

Description: Converted the remaining Reporting tab reports to the Report Center:

1. Backorder Report
2. Ebay Performance
3. Inventory
4. Product Performance
5. Purchase Orders Report
6. Receiver Log
7. Recurring Orders

Bug List

The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-15974	Fixed issue with Shipping Tax not being recorded for all Financial reports.
BUG-15971	Fixed issue with scheduled reports cron not referencing the real user account for scheduled reports.
BUG-15969	Updated UPS real time calculations settings so that rates are generated accurately.
BUG-15967	Updated alignment of Stock PO template header to be justified to match data beneath it.
BUG-15966	Fixed issue with form module plug-in Create Account function not generating accounts when form is submitted.
BUG-15956	Fixed issue with the Subclass filter in the Product Manager not working correctly.
BUG-15953	Updated customer search results in Customer Manager so that if searching by sales rep, only customers assigned to that sales reps are returned.
BUG-15952	Fixed 'Credit Card Reauthorization Automation' so that it would run.
BUG-15951	Fixed issue in Shipment Manager with the 'delayed delivery date' column not always grabbing the correct delayed delivery date for that shipment.
BUG-15950	Updated the code in the website and SOI specific to applying an invalid coupon. When attempting to apply such coupon, the system will display message: 'COUPON_CODE was not successfully used on this order'.
BUG-15947	Updated the Connect POS, when using Tempus, to correctly void a credit card.
BUG-15946	Updated the code to manually generate loyalty rewards for a customer after editing their points in the Customer Manager.
BUG-15945	Updated searching with a custom product field to work in the Deal Manager.
BUG-15944	Updated PO Builder > Purchase Order Summary to load the 'Delete' button correctly after deleting an item.
BUG-15941	Updated the Connect POS code to check for printing of signature receipts regardless of printing, emailing or doing nothing with the receipt.
BUG-15932	Updated Inventory Manager to allow assignment of Use Distribution Center for non-grid products.
BUG-15931	Updated the code to recalculate return prices if a coupon is removed or added on a website order.
BUG-15930	Fixed Connect POS issue with an exchange of an item with the same product ID, same price, and then adding an order adjustment that resulted in the order not balancing out correctly.

BUG-15929	Fixed issue in the Customer Manager where users could change the club membership after a club is cancelled.
BUG-15925	Updated the code on the Connect POS that disables IHA payments on non-IHA orders to also disable Payroll Deduction payment option.
BUG-15924	Fixed issue with New Customer button not working in the same manner between the one at top of screen and the other at bottom of the Customer Manager screen.
BUG-15917	Fixed issue with user name with extra space at the end not being able to generate reports.
BUG-15916	Fixed issue with Barcode field option not displaying on report results when selected as criteria.
BUG-15902	Fixed issue with "Apply All Sales Tax Rules" function under Data Import not working correctly.
BUG-15901	On the Connect POS, removed the ability to delete the auto-applied exchange payment when balance is due to the customer.
BUG-15897	Updated the "Clear Cached Variables" function in the User Account Manager to not save user account information, instead account information is only saved when using the Update User button.
BUG-15891	Updated product links in the sitemap to use the canonical URL versus product URL.
BUG-15887	Updated to the Club Membership code to only display in the Customer Manager > Club Membership drop-down only if it is active OR if it is the current club membership selected.
BUG-15883	Fixed Sales Tax Rules drop-down to display correctly in the eBay channel manager.
BUG-15879	Updated code so that the Back Office Post Comment pop-up maintains its auto-focus functionality.
BUG-15878	Updated the Connect POS code to not show EXCH return payment types.
BUG-15864	Fixed issue with the ability to use multiple gift certificates for a single website order.
BUG-15860	Fixed issue in Connect POS to correct functionality of the Clear button when using the Order Search function.
BUG-15857	Update Connect POS code to prevent process failure if cashiers apply an IHA to a customer twice before the first process has finished.
BUG-15855	Updated Category Management to default to the 'Merchandise Hierarchy' for auto-population if the category is using merchandise hierarchies for population.
BUG-15854	Updated Physical Inventory Count Manager so that 'Input' link option displays the 'On Hand Count'.
BUG-15852	When 'creating from live' in the Website Template Manager, fixed it so form plug-ins correctly copy over the 'Captcha' setting.
BUG-15849	Fixed issue with adding inventory through the In Stock tab of the Inventory Manager, which was not updating inventory changes.
BUG-15846	Updated the SOI code to do deal calculation after personalizations are added to cart.
BUG-15842	Updated the PO background process code to set the user ID correctly when it's running instead of listing user as None/Website.
BUG-15831	Updated the code to prevent order item adjustments if the adjustment is more than the amount of the item.

BUG-15812	Updated Shipping Regions creation to only display error if there is at least one row in the blacklist.
BUG-15811	Updated the Inventory Manager to be able to sort by either description or short description.
BUG-15807	Fixed issue with Connect POS Saved Search functionality not saving searches correctly.
BUG-15806	Changed loading the IHA part of the Customer Information page in the SOI to add the active and channel checks as part of the query instead of checking every IHA for those requirements to decrease load time.
BUG-15773	Fixed issue with the Sort by options not working for either Report Builders.
BUG-15767	Added a server-side check for 'POS - Create Order Without Full Payment' upon Connect POS checkout; if it finds that you don't have that permission, it will present an error.
BUG-15300	Added ability to grab shipping methods on website product page for that product and any products in the cart.
