Release Dates:	Release Date: June 26, 2018 Current Release Type: RC 2(Empire) General Release: July 31, 2018
Also Includes Items from Release(s):	Beta 1, RC1, Beta 2

What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

Enhancement: **SS-2543: Batch Pick Pack List Template Tag**

Version: 5.15

System Path: Email & Documents Tem[plate Manager

Description: Created a new template tag in 5.15 labeled 'batch_pick_pack_list' that allows users to put the 'Master' and (Regular) 'Pick' lists together, instead of using 'master_pick_list' (which would cause it to only print once), they can use 'batch_pick_pack_list' instead. It has the exact same code as master_pick_list but it unsets that tag after being used the first time.

Bug List

The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.
