Product:	CORESense Application Software
Release Number:	Versions 5.15, 7.4 and higher
Release Dates:	Release Date: September 11, 2018 Current Release Type: Beta 2(Governor) General Release: October 30, 2018
Also Includes Items from Release(s):	Beta 1, RC 1

What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

Enhancement: **SS-2607: Connect POS Value Card returns**

Version: 7.4

System Path: Connect POS

Description: Added new connect setting 'returns.defaultValueCardPayment' which controls whether value card payments are pre-populated on returns.

Enhancement: **SS-2585: URL Redirect Sorting**

Version: 7.4

System Path: URL Redirect Manager

Description: The drop down options in the Product > URL Redirect Manager have been updated to be sorted in an ascending label order.

Enhancement: **PS-5240: Reporting Merchandise Hierarchy Option**

Version: 7.4

System Path: Reporting

Description: Updated Financials Returns, Orders and Order Items Reports to have new field 'Merchandise Hierarchy', which lists the highest level merchandise hierarchy.

Enhancement: **PS-5233: Back Office Comments**

Version: 7.4

System Path: Back Office Comments

Description: Updated the Comments' section to display an ellipsis on a message if it exceeds 200 characters, with a magnifying glass at the end. Clicking the magnifying glass opens a pop-up that provides the full message.

Enhancement: **PS-5225: Deal Calculation Update**

Version: 7.4

System Path: Deal Manager

Description: Updated deal calculation to check for the new system setting 'Exclude Items Using Customer Quantity Based Pricing From Deal Engine,' which determines exclusion for deal calculation for that product or for using it for other product's deals.

Enhancement: **PS-5224: Inventory Price Permission**

Version: 7.4

System Path: Inventory Manager

Description: Added new permission: "Inventory Manager - Fields To View - Price." Permission can be assigned to user by CORESense and then that user can assign to others as needed.

Also added 'Price' column to Inventory Manager search results.

Enhancement: **PS-5221: Personalizations**

Version: 7.4

System Path: Personalizatipons

Description: Fixed issue with Personalizations marked as non-required still triggering errors if not selected when added to cart.

- Enhancement:** **PS-5218: Physical Inventory Count Manager Column**
- Version:** 7.4
- System Path:** Physical Inventory Count Manager
- Description:** Updated the Physical Inventory Count Manager count sheet to have a 'SKU ID' column.
-
- Enhancement:** **PS-5211: Connect IHA Returns**
- Version:** 7.4
- System Path:** Connect POS
- Description:** Added new Connect POS setting 'ihaExchange' that will not allow an exchange to be done for an order that originated as an IHA order.
- Updated the Return / Exchange process so that if you put in an IHA order, it'll only show Return options.
-
- Enhancement:** **PS-5161: Inventory Manager Quick Transfer**
- Version:** 7.4, 5.15
- System Path:** Inventory Manager
- Description:** Updated the Inventory Manager 'Edit Inventory' pop-up to include a 'Quick Transfer' button with location box. One can scan the ID or use the location picker. It will automatically do an intra-warehouse transfer from the current location to the specified location.
-
- Enhancement:** **PS-5134: Inventory Manager Drop-ship**
- Version:** 7.4, 5.15
- System Path:** Inventory Manager
- Description:** Updated the 'Auto-Close Drop-Ship POs' process to check whether the vendor associated with the shipment has 'Send Shipment Notification for Auto-Closed Drop-Ship POs' selected, it will send a notification email during this process.

Enhancement: **PS-5133: Shipment Picker and Packer**

Version: 7.4, 5.15

System Path: Shipment Manager

Description: Added the ability to set a picker and packer for shipments, as well as updating them in batch via the Shipment Manager and via a (new) data feed import.

The data feed type is 'Shipments Picker Packer Import'.

Enhancement: **PS-5105: SOI Custom Fields**

Version: 7.4

System Path: SOI

Description: Added the ability to modify order item custom fields in the SOI. At the end of each order item line (alongside the hammer / wrench and delete icons) is a plus icon that opens a pop-up with that order item's custom fields.

Enhancement: **PS-5065: Order Discount Deal Criteria**

Version: 7.4

System Path: Deal Manager

Description: Added a new Order Discount Deal criteria, 'Product Quantity Threshold', that requires that you have that much of any of the included products on that deal for the deal to apply.

Enhancement: **PS-5049: New Data Feeds**

Version: 7.4

System Path: Data Feed Manager

Description: Created new data feeds: Inventory Import and Inventory Export. The Inventory Export data feed inventory movement since the last time the data feed was run, while the Inventory Import data feed allows one to update in stock inventory for skus at a particular location.

Enhancement: **PD-1718: Connect POS Gift Order**

Version: 7.4

System Path: Connect POS

Description: Added 'Gift Order?' option (as used in Classic POS) when doing a Connect POS Return.

Enhancement: **PD-1717: Connect IHA Process**

Version: 7.4

System Path: Connect POS

Description: Updated the 'Join IHA' process to have a drop-down list of available IHAs for that channel (like Classic POS) instead of a search field.

Enhancement: **PD-1716: Connect Tax Exemption**

Version: 7.4

System Path: Connect POS

Description: Updated the Connect POS to no longer throw an error when recognizing existing tax exemption certificates, and instead updates the certificate and add /updates the associated customer. It still applies the found certificate to the order.

Enhancement: PD-1710: **Connect Return Receipt**

Version: 7.4

System Path: Connect POS

Description: Updated Return Receipts to print 'Customer #: NEW' if no customer ID found.

Enhancement: PD-1709: **Connect Loyalty**

Version: 7.4

System Path: Connect POS

Description: Updated Connect POS > Loyalty to be able to add loyalty cards whenever you want and not just if the customer doesn't have a loyalty card.

Enhancement: PD-1705: **Connect Loyalty**

Version: 7.4

System Path: Connect POS

Description: Updated Connect POS to use cashier's (user's) first name instead of user name for 'Cashier' value when printing on receipts.

Enhancement: PD-1703: **Magento Log Updates**

Version: 7.4

System Path: Magento

Description: Updated the Magento Process logs to record the created or updated CORESense Order #.

Updated the Magento Process logs to work correctly when a payment has only been authorized.

Bug List

The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-16216	Fixed the Product/SKU import to set vendors array.
BUG-16212	Fixed issue with the New button inside the Club Membership of the customer account on the Connect POS that was directing the user to the wrong URL.
BUG-16191	Fixed issue when applying and / or removing IHA to the Connect POS order that has product with a deal that continued to apply the deal even after IHA was removed from order.
BUG-16183	Updated category navigation to cache the customer's IHA's department's ID, if the order is using an IHA, so that different categories will show for different IHAs, depending on the settings.
BUG-16182	Fixed issue with Connect POS bogo deals displaying products in shopping cart incorrectly.
BUG-16181	Fixed issue when IHA payment was applied to order, the payment was not being applied to the

	customers IHA.
BUG-16180	Updated the Connect POS completing a layaway payment to create the 'change due' payment on the order.
BUG-16177	Fixed issue with Customer Saved Search not returning accurate date based data.
BUG-16165	Updated the Product Index Plug-in to not be hard-coded to only work with the 'product_sitemap' subpage.
BUG-16160	Updated Connect POS order creation, if doing an exchange, to grab the customer created by the return side of the exchange and use that customer ID.
BUG-16150	Fixed issue with 5.15 Inventory Manager inventory deletion value not being accurate.
BUG-16144	Fixed issue with Connect POS Order Adjustment rounding inaccuracy.
BUG-16142	<ol style="list-style-type: none"> 1. Updated the shipment document viewer to only allow changing the shipment status if the shipment isn't locked (shipment is shipped or order is locked). 2. Updated the shipment document viewer to change status via shipment entity, which will record the status change in the order audit log.
BUG-16141	Updated Connect POS to set same variable as Classic when applying an IHA to an order.
BUG-16118	Updated system to enable the receiving of large POs to not time out and should not take longer than a minute.
BUG-16070	Fixed issue with IHA Department Clients being added in multiple times.
