What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

Enhancement: **SS-2631: Add Product Name to SKU Picker**

Version: 7.4

System Path: SKU Picker

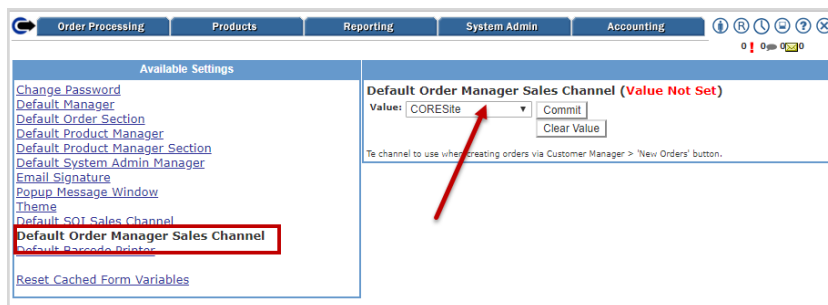

Description: Added 'Product Name' column to the SKU picker, which is based on the SKU's default product. If no default product is set, 'Unknown' is displayed.

Enhancement: **PS-5257: New Order Manager Default Channel**

Version: 7.4

System Path: Customer Manager

Description: Added a new user preference for deciding which channel to default to when creating a new order via the Customer Manager > 'New Order' button. Go to  icon and select "Default Order Manager Sales Channel."

Enhancement: **PS-5255: Cart Quantity Update**

Version: 7.4

System Path: Website

Description: Created a new website Ajax target to auto-update quantities so that the page no longer needs to be refreshed.

Enhancement: **PS-5254: CORESense Product Reviews Update**

Version: 7.4

System Path: Product Review Manager

Description: Added the following updates to the CORESense Product Reviews:

1. Added 'Default Results Per Page' option to Product Review plug-in.
2. Added the ability to set verified purchaser via the Product Review Manager.

Enhancement: **PS-5249: Web Checkout Form**

Version: 7.4

System Path: Credit Card Form

Description: Updated credit_card_fragment protected smarty template to add class="form_field_required" to all inputs in this credit card form.

Enhancement: PS-5239: **FedEx One Rate**

Version: 7.4

System Path: Shipping Manager

Description: Added (FedEx) 'One Rate' option for shipping methods, which adds 'FEDEX_ONE_RATE' to the API call as a SpecialServiceTypes. Also available when printing FedEx labels.

Enhancement: PS-5234: **Category Navigation Update**

Version: 7.4

System Path: Category Navigation

Description: Updated category navigation searching to look at category name OR category URL override when searching for a term.

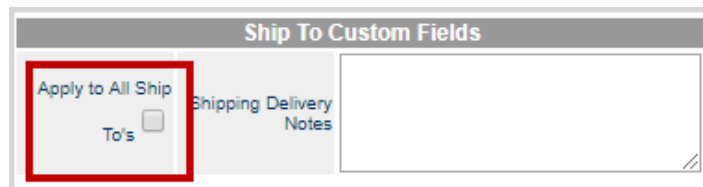

Enhancement: PS-5219: **Delayed Delivery Shipment Date**

Version: 7.4

System Path: Order Manager > Shipping

Description: Added 'Apply to all Ship To's' checkbox for 'Delayed Delivery Date'.

Note that it works like the other check boxes; the current ship-to must have the delayed delivery date set and the others will copy whatever is currently set.

Enhancement: **PS-5166: Exported Shipment Deletion**

Version: 7.4

System Path: ODBC Shipment Tables

Description: Updated system to delete shipments from ODBC export tables if the shipment is deleted within CORESense.

Enhancement: **PS-5085: IHA Recurring Orders**

Version: 7.4

System Path: Order Manager

Description: Updated various system locations so that, if you use an IHA payment on an order that is going to have a recurring order made, it will have the recurring order also use that IHA (Department) for future recurring orders. Note that if both credit card and IHA is on the recurring order (however it gets there), it will only use credit card for the recurring order payments.

Enhancement: **PS-5058: Return Adjustments Tax Option**

Version: 7.4

System Path: Returns

Description: Previously, return adjustments were always non-taxable; updated Return Wizard and Connect POS so that user can determine whether return adjustments should be taxable or non-taxable.

Enhancement: **PD-1723: Report Center Update**

Version: 7.4

System Path: Reporting

Description: Upgraded Report Center reports to retain information when switching between product types.
