

Fall 2018 Product Release Information

Product:	CORESense Application Software
Release Number:	Versions 5.15, 7.4 and higher
Release Dates:	Release Date: October 9, 2018 Current Release Type: RC 3(Governor) General Release: October 30, 2018
Also Includes Items from Release(s):	Beta 1, RC 1, Beta 2, RC2

What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

Enhancement: **SS-2650: Inventory Report Export**

Version: 7.4

System Path: Reporting tab

Description: Updated the Inventory Report to be exportable.

Enhancement: **SS-2648: Connect POS Setting**

Version: 7.4

System Path: System Settings > POS Replication Manager

Description: Created new POS terminal setting 'disableManualCreditCardEntry' to disable manual credit card entry.

Enhancement: **SS-2646: Template List**

Version: 7.4

System Path: Form Plug-ins

Description: Sorted the template drop-downs in all form plug-ins to be sorted alphabetically.

Enhancement: **SS-2643: Inventory Adjustment Data Feed Changes**

Version: 7.4

System Path: Data Feed Manager > Inventory Adjustment Feed

Description: Updated the 'Inventory Adjustment' Import Data Feed to allow for a new 'Function' column labeled 'Move,' and a new column labeled 'Destination Location Id'. The function removes the quantity from the 'Location Id' and adds that quantity to the 'Destination Location Id'.

Enhancement: **SS-2641: Connect POS IHA List**

Version: 7.4

System Path: Connect POS > Join IHA

Description: Added IHA ID to the IHA list. Since the IHA name is shortened, the ID is at the beginning of the list and not the end so that it's always available.

Enhancement: **SS-2640: Connect POS Customer Credit**

Version: 7.4

System Path: POS Replication Manager

Description: Added new option to display customer credits in the info bar on the Connect POS, via a new POS setting: "infoBar.displayCustomerCredits.enabled".

Enhancement: **SS-2639: Connect POS IHA Search**

Version: 7.4

System Path: Connect POS > Search IHA

Description: Updated the Connect POS IHA search list to show as much of the full IHA name as possible.

Enhancement: **SS-2638: Salesman Custom Fields**

Version: 7.4

System Path: Order Manager > Salesman

Description: Updated the Order Manager > Salesman section to allow editing of custom fields even if the order is locked / closed and they have the new permission.

Enhancement: **SS-2610: PayPal Smart Payment Button v4**

Version: 7.4

System Path: Website > PayPal

Description: Added support for PayPal Smart button. Documentation is provided in the online documentation plug-ins list.

The following is how to implement Paypal v4.

1. Step 1: Add the following to your website's checkout page:

```
<script src="https://www.paypalobjects.com/api/checkout.js"></script>
```

2. Step 2: Replace the paypal button with the following:

```
<div id='paypal-button-container'></div>
```

3. Step 3: Add the following javascript to the checkout page:

```
currency: 'USD',
    }
  ]
  });
},
onAuthorize: function(data, actions) {
  return actions.payment.execute().then(function() {
    $.ajax({
      url: "ajax_targets/paypal_payment.php",
      data: {
        data: data
      },
      method: "POST",
      success: function(response) {
        window.alert('Payment Complete!');
      }
    });
  });
}, '#paypal-button-container');
});
```

Note that depending on how your website is set-up, you may edit this javascript to be part of another function. You can change in the javascript how the paypal button looks, which buttons to load, and what should happen once paypal returns successfully. You will need to replace '<insert production client id>' with your paypal client id.

Enhancement: PS-5263: Receiving Log Report Updates

Version: 7.4

System Path: Receiving Log Report

Description: Made the following changes to the Receiving Log Report.

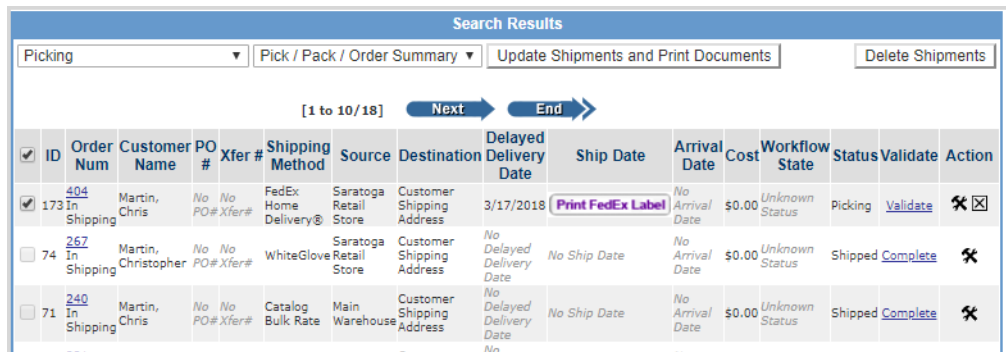

- Added a new column labeled, "Open Balance" which displays the difference between 'Expected Qty' and 'Receiver Qty'.
- Added a third option labeled, "Hide Retail and Cost" under "Options" that when selected does not include the columns Retail Each, Cost Each, Received Retail, and Received Cost in the view mode or CSV export.

Enhancement: PS-5258: Shipment Manager Batch Delete

Version: 7.4

System Path: Shipment Manager

Description: Added a new permission 'Shipment Manager - Batch Delete Shipments' that allows access to a new button in top right corner of Shipment Manager search results labeled 'Delete Shipments.' The button allows a user to delete any selected shipments.

<input checked="" type="checkbox"/>	ID	Order Num	Customer Name	PO #	Xfer #	Shipping Method	Source	Destination	Delayed Delivery Date	Ship Date	Arrival Date	Cost	Workflow State	Status	Validate	Action
<input checked="" type="checkbox"/>	173	404 In Shipping	Martin, Chris	No PO#	No Xfer#	FedEx Home Delivery®	Saratoga Retail Store	Customer Shipping Address	3/17/2018	Print FedEx Label	No Arrival Date	\$0.00	Unknown Status	Picking	Validate	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/>
<input type="checkbox"/>	74	267 In Shipping	Martin, Christopher	No PO#	No Xfer#	WhiteGlove	Saratoga Retail Store	Customer Shipping Address	No Delayed Delivery Date	No Ship Date	No Arrival Date	\$0.00	Unknown Status	Shipped	Complete	<input checked="" type="checkbox"/>
<input type="checkbox"/>	71	240 In Shipping	Martin, Chris	No PO#	No Xfer#	Catalog Bulk Rate	Main Warehouse	Customer Shipping Address	No Delayed Delivery Date	No Ship Date	No Arrival Date	\$0.00	Unknown Status	Shipped	Complete	<input checked="" type="checkbox"/>

Enhancement: PS-5256: Template Updates

Version: 7.4

System Path: Website Template Manager

Description: Unprotected the 'edit_billing_protected' and 'edit_shipping_protected' templates.

Enhancement: PD-1714: **Connect POS IHA Receipts**

Version: 7.4

System Path: Connect POS

Description: Added IHA information section to Connect POS sales receipts. There is no setting for this, the information is automatically added if an order is an IHA order.

Bug List

The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-16308	Fixed issue with Financials > Returns report generating incorrect data.
BUG-16301	Updated the SOI code to recalculate the total of an item after personalizations are applied to the order item so that item price adjustments can be made against the whole price.
BUG-16294	Fixed the Product/SKU Data Import to set shipping cost drivers appropriately when importing SKUs.
BUG-16292	Updated system calculation when adding a product to an order to recalculate sales tax for all order items, not just the order item being added.
BUG-16291	Fixed issue with Connect POS reprinting of receipts for returns and exchanges.
BUG-16289	Fixed issue with inventory receiving of overages not being recognized as received due to no SKU dimensions.
BUG-16282	Fixed issue with Customer Data Import failing due to being unable to write to the import log.
BUG-16280	Updated order close process to set the order status to be 'Fully Shipped Order Status', then to also check for the layaway status should that need to be updated. System will only update if the order is a layaway order and there is no balance due left.
BUG-16279	Fixed issue with the Customer Saved Search criteria 'Product Merchandise Hierarchy' not being accounted for.
BUG-16278	Fixed issue in the PO Builder, where if you clicked on "Summary" and then clicked on an individual Product, it was redirecting to the main PO Builder menu.
BUG-16277	Fixed issue in 5.15 UPS Worldship cron to prevent it from failing on order number check.

BUG-16269	Fixed issue with Connect POS receipts missing order number.
BUG-16264	Fixed issue with Order Manager function that creates a blank email not working correctly.
BUG-16252	Fixed issue with Connect POS orders not clearing due to Ingenico clear order messaging.
BUG-16192	Fixed issue in Connect POS that was causing incorrect X-out report for a single terminal.
