Also Includes Items from Release(s):	Beta 1, RC 1, Beta 2, RC2, RC3

What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

Enhancement: **PS-5295: Product Review Email**

Version: 7.4

System Path: Product Reviews

Description: Updated smarty document template for product_reviews_followup_products to correctly put a forward slash (/) at the end of the base href if needed. Also fixed the email so that it was sent to the order billing email address.

Enhancement: **PS-5202: Shippo Integation**

Version: 7.4

System Path: Shipping

Description: Effective December 31, 2018 CORESense will discontinue UPS Live Rate service via UPS API. UPS will no longer support the API used by CORESense after this date.

To fill this gap and to also provide our clients the additional ability to print UPS and USPS labels directly from the CORESense back office, CORESense has partnered with Shippo (<https://goshippo.com/>) a multi-carrier API and web app that help retailers, marketplaces and platforms connect to a global network of carriers.

Please note that CORESense will continue to support all other live rate, shipping, label printing and third party shipper integrations and services for the foreseeable future. The only service being discontinued is UPS live rate.

CORESense will be releasing support for Shippo in the 2018-governor-rc4 Stable release scheduled for 10/30/2018. Support will include live rate, shipping and label printing from the CORESense back office for UPS and USPS.

If you currently use UPS live rates on CORESense then you need to complete the following steps to insure uninterrupted service before December 31 2018:

1. Contact Shippo to setup an account. The contact is:

Richard Garcia: Business Development

richard@goshippo.com

(408) 916-3579

<https://goshippo.com/>

2. Once that is done contact CORESense professional services via the customer portal and request that Shippo service be activated in your back office. We will process requests once the release goes out. Title your case - "Shippo Setup for UPS".

3. Setup Shippo in CORESense per provided online documentation. This will be available with the 10/30/2018 release.
