### What's New?

Following is a summary of the bug fixes for this software release. Unless you requested to be a Release Candidate, the fixes listed below are not available until the General Release date noted above.

### Bug List

**IMPORTANT:** The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
13916	Made additional fixes to the CJ Affiliates website plugin per recommendations from Commission Junction.
14139	Fixed an issue on the Connect POS where configuration price was not included when performing a return without an originating order.
14159 and 14185	Fixed issues with eBay orders not getting created correctly.
14175	Fixed display of personalizations in Sales Report Builder when Include Personalizations is selected as a result field.
14186	Fixed issues preventing labels from being generated.
14187	Fixed an issue that prevented filtering by Inventory Transactions Report by reason.
14189	Fixed an issue with Order Lifecycle Automation incorrectly putting orders into the status set for Requires Manual Sourcing.
14190	Fixed issue with Classic (Legacy) POS reports displaying white screen when selecting Reporting tab > then daily transactions report, z-out report or x-out.
14194	Fixed issue with website category list not reflecting actual category list when assigning to products.
14195	Corrected issue with product duplication not carrying over all data from the originating product to the new product.
14201	Corrected Product Performance report to accurately display results according to specified "Period" criteria.
14204	Corrected Barcode search in the SOI products search criteria so that products display in results view.
14211	Corrected Accounting > Adjustments report to display State field.
14217	Updated delimited file reader (csv, tab) for data imports and data feed imports to continue processing file if blank line is encountered.
