Product:	CORESense Application Software
Release Number:	Versions 5.15, 7.4 and higher
Release Dates:	Beta Release Date: February 28, 2017 Current Release Type: RC2(Jim Dandy) General Release: April 25, 2017
Also Includes Items from Release(s):	Beta 1, RC1, Beta 2,

What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

Enhancement: PS-4776: Barcode Mapping Option

Version: 7.4

System Path: System Settings

Description: Added the ability to include the Product Department (from Merchandise Hierarchy) field as an available option to map with the barcode labels. This field is available in Back Office > System Settings > Products/Labels.

Enhancement: PD-1430: System Performance

Version: 5.15, 7.4

System Path: Administrator Function

Description: Updated worker daemon to better handle and prioritize Background jobs during heavy volumes.

Enhancement: PD-1420: Receiver Data Feed

Version: 5.15, 7.4

System Path: Receiver Data Feed Import

Description: Updated the Receiver Data Feed Import so that it emulates manual receiving of a PO's Receiver and so it also deals with the order's shipments by assigning that inventory to a shipment.

Bug List

IMPORTANT: The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-14353	Fixed issue with website orders being submitted with quantities of zero.
BUG-14351	Updated warehouse import to support other delimiters beside commas.
BUG-14348	Fixed issue with Connect POS receipt length and auto-cutting of receipts.
BUG-14346	Fixed issue with PO receiver data feed not displaying COGS for reporting.
BUG-14345	Fixed issue with website increased memory causing a 500 Error display at checkout.
BUG-14344	Corrected issue with multiple personalizations where the first quantity entered was being replicated against the other personalization quantities.
BUG-14343	Updated Classic POS to handle IHA assignment when creating a new customer account.
BUG-14342	Fixed issue with model stock reordering quantities not being populated correctly in the Recommended Purchase Orders.
BUG-14339	Updated Customer Manager > Club Membership to display the correct salesman ID for the Club Membership order.
BUG-14337	Fixed issue with IHA payment type being applied to a non-IHA order.
BUG-14336	Fixed issue with IHA report not generating due to unknown order item.
BUG-14334	Corrected issue with Physical Inventory Count access and searching function.
BUG-14321	Updated Website Template Manager to display message of "None Found" when searches have no results.
