

## March 2017 Product Release Information

<b>Product:</b>	<b>CORESense Application Software</b>
<b>Release Number:</b>	Versions 5.15, 7.4 and higher
<b>Release Dates:</b>	RC Release Date: April 4, 2017 <b>Current Release Type: RC3(Jim Dandy)</b> General Release: April 25, 2017
<b>Also Includes Items from Release(s):</b>	Beta 1, RC1, Beta 2, RC2

### What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

**Enhancement:**      **PS-4817: PO Builder Description**

**Version:**            7.4

**System Path:**      PO Builder

**Description:**      Updated the display of the product description in the PO Builder so that only the first 20 characters are displayed followed with ellipses if more data exists, so that it fits on a single line.

**Enhancement:**      **PS-4795: Connect POS Updates**

**Version:**            7.4

**System Path:**      Connect POS

**Description:**      Added the following miscellaneous items to the Connect POS:

- Changed the POS Report called "XOut" to "X Out Register."
- Changed the default Order Level Adjustments calculator to % versus \$.
- Display of the Balance Due in the footer on the Return Checkout screen.
- Adjusted the Loyalty Reward text on the footer information bar to identify non-members by displaying the following "Loyalty Reward: Non-Member."

**Enhancement:** **PS-4793: Connect POS Permissions**

**Version:** 7.4

**System Path:** Connect POS

**Description:** Added the following permissions to the Connect POS:

- Connect POS - Gift Certificate Button
- Connect POS - Save As Quote
- Connect POS - Product Add Notes
- Connect POS - Product Change Salesperson
- Connect POS - Change Salesperson

**Enhancement:** **PS-4806: Magento Feed Update**

**Version:** 7.4

**System Path:** Magento Integration

**Description:** Enhanced Magento product feed to support linking a simple product from Magento into CORESense as a configurable product.

**Enhancement:** **PS-4765: SixBit Integration**

**Version:** 7.4

**System Path:** Data Feed Manager

**Description:** Created new data feed to send product information to SixBit.

**Enhancement:** **PS-4829: ESC Printer Support**

**Version:** 7.4

**System Path:** Connect POS

**Description:** Added support for sending Page Mode commands to ESC printers

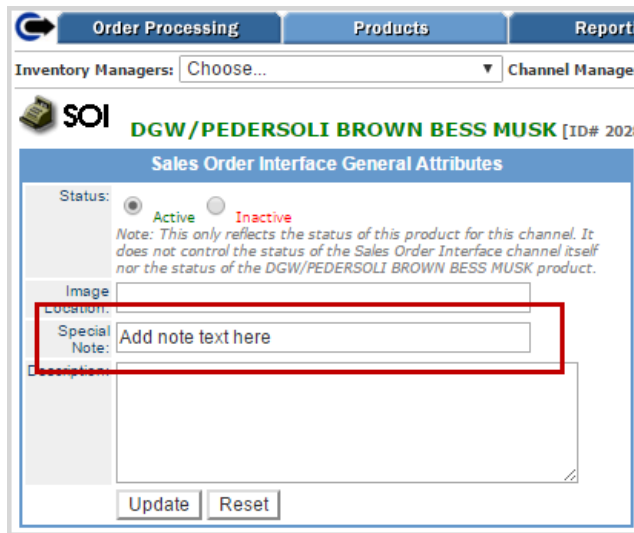

- A new POS setting is now available, "receiptPrinter.epson.pageMode".
- This adds additional commands needed for Star Micronics ESC/POS emulating printers.

**Enhancement:** PS-4833: SOI Special Note

**Version:** 7.4

**System Path:** SOI

**Description:** Added a Special Notes field to the SOI Channel so that product specific messaging can be displayed per a line item in the SOI Order Items. Special Notes can be added in Product Manager > Channels > SOI. The note will display in red text in the Order Items box of the SOI.

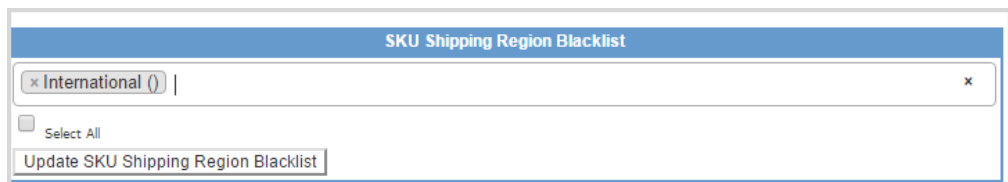

**Enhancement:** PS-4832: Blacklist SKUs from Shipping Regions

**Version:** 7.4

**System Path:** Inventory Manager

**Description:** Added the ability to specify a list of Shipping Regions on a SKU that will be blacklisted and cannot be shipped to. Per SKU go to Inventory Manager > Shipping and update shipping method cost calculation to not return a shipping method if a SKU is blacklisted for the region / shipping method combination.

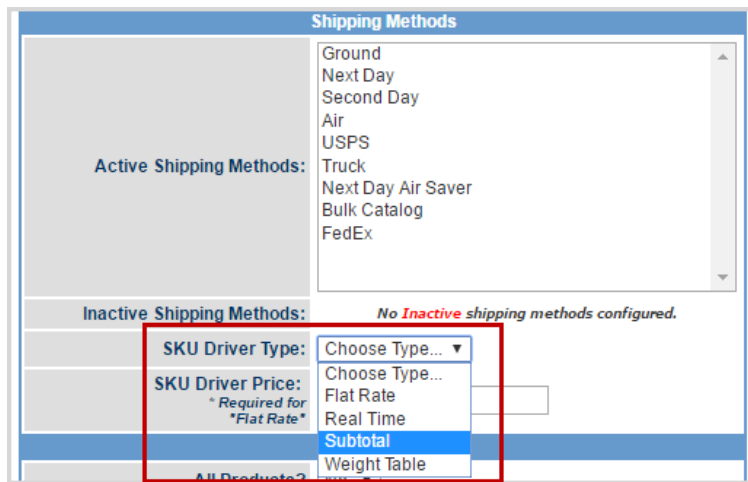

**Enhancement:** PS-4831: Subtotal SKU Shipping Driver

**Version:** 7.4

**System Path:** System Settings > Tools > SKU Shipping Driver Manager

**Description:** Updated SKU Shipping Drivers to have a "Subtotal" option. If specified for SKU(s) on an order, the subtotal of the order items will be added together to calculate the range to lookup in the existing Discounted Order Subtotal Ranges table on the shipping method. This will then be added with any other cost drivers (flat, weight or live) to get the total shipping cost.

**Enhancement:** PD-1443: POS Replication Manager Token Management

**Version:** 7.4

**System Path:** Connect POS

**Description:** Opened up Token Management within the POS Replication Manager to anyone with access for Connect POS

- Users can now reset existing tokens, or generate tokens for POSs missing tokens (this is rare).
- Removed the "Really reset this token?" message when generating a token for a POS that doesn't have one.

## Bug List

**IMPORTANT:** The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-14395	Fixed issue with detection of whether PayFlow payment processor is online during credit card capture automation.
BUG-14391	Fixed issues with returns on Classic POS (refunding to value cards and sales tax calculation).
BUG-14387	Fixed calculation of assigned quantity on production tab of the Order Manager.
BUG-14384	Corrected a website display issue of mini-cart still displaying items when cart order confirmation was completed.
BUG-14383	Fixed issue where the wrong 'ship from' address to FedEx, which was calculating incorrect shipping costs in the SOI.
BUG-14361	Fixed issue with warehouse sourcing based on updating the code to ignore any warehouse that has in stock count of 0, since it is necessary to have an in stock amount to use a warehouse, regardless of the supplied required amount for a SKU. Only affected if using group shipments by order item system setting.
BUG-14382	Updated Club Membership suspension display so that the suspension reason is always visible.
BUG-14416	Fixed issue with Order Discount coupon not being applied and message of coupon success message still being displayed on website.
BUG-14413	Adjusted Magento import to support missing product fields.
BUG-14411	Updated purchasing email templates to recognize <cogs> tag when used independently.
BUG-14410	Fixed issue with use of missing originating brand ID causing blank confirmation screen upon purchase of gift certificate.
BUG-14409	Fixed issue with the website compare products function so that when a product was de-selected it would no longer remain on the compare list.
BUG-14407	Fixed issue with search ability of SKU ID within the Product Manager.
BUG-14405	Fixed issue with Free Gift discount so that the appropriate quantity is recognized for the discount.
BUG-14403	Fixed issue with Connect POS to recognize Ingenico card payments as credit card payments so that upon a return, the credit card payment is recognized and available for refund.
BUG-14400	Fixed issue with the Returns Wizard not displaying who the item was shipped to.

BUG-14389	Fixed issue in PO receiving when adding more of an existing SKU in the PO Manager and new quantities not being added to the existing SKU and creating another line of the same SKU.
BUG-14365	Fixed issue with last step display in SOI not opening when using Windows Edge.
BUG-14422	Fixed with Deal Manager not including all products as defined by product criteria.
