

Fall 2019 Product Release Information

Product:	CORESense Application Software
Release Number:	Versions 5.15, 7.4 and higher
Release Dates:	Release Date: September 17, 2019 Current Release Type: Beta 2(Lake) General Release: October 29, 2019
Also Includes Items from Release(s):	Beta 1, RC1

What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

Enhancement: **SS-2987: Avalara Tax Calculation**

Version: 7.4

System Path: Avalara

Description: Updated Avalara shipping tax calculations to look for exemptions.

Enhancement: **SS-2978: PO Builder Features**

Version: 7.4

System Path: PO Builder

Description: Added functionality to the PO builder to allow zeroing out the builder and the ability to upload a CSV file within the builder. Additions include:

- Added Zero Out button to PO Builder that sets all quantities being viewed to 0.
- Add the ability to upload a file to add items to the PO Builder. The format of the file includes SKU Id, Vendor Id and Quantity. System checks to see if the SKU / Vendor and Stock Fulfillment already exist in the PO Builder. If so, adds the specified quantity to that record. If not, adds a record to the PO Builder using the vendor defaults for email/document template and shipping.

Enhancement: **PS-5517: Add GET API for Product Markdown**

Version: 7.4

System Path: GET API

Description: Added ProductMarkdown endpoint (GET).

Enhancement: **PS-5516: Clutch Update**

Version: 7.4

System Path: Clutch

Description: Added the ability to set setting for the field via 'data_feed_settings' table (accessible through Tech. Config.). Allows user to update that column to ignore certain product fields, user can add a field of 'googleProductCategory_ignore_fields'.

Enhancement: **PS-5515: Listrak Update**

Version: 7.4

System Path: Listrak

Description: Updated the 'Listrak Order Item Export' and 'Listrak Product Export' Data Feeds so that it no longer requires a channel to be set.

Enhancement: **PS-5511: UPS Worldship Export Update**

Version: 7.4

System Path: UPS Worldship Export

Description: Added fulfillment_warehouse_id and fulfillment_warehouse_label to the ups_worldship_export table and modified the creation of the ups_worldship_export to write these values to the table.

Enhancement: **PS-5502: Transfer Builder Update**
Version: 7.4
System Path: Transfer Builder
Description: Updated Overstock Transfer Builder to have 'Create Transfer & Receive' button.

Enhancement: **PS-5500: UPS Worldship Import Update**
Version: 7.4
System Path: UPS Worldship Import
Description: Updated UPS Worldship Import to have new field and set it on the shipment's shipment boxes if the box_weight field is filled.

Enhancement: **PS-5450: Credit Card API Endpoints**
Version: 7.4
System Path: API
Description: Added GET and PUT endpoints for credit_card and credit_card_token.

Notes:

- The credit card's payment type ID and the payment processor ID it is being created for are needed for credit card creation, but there are no endpoints for payment type or payment processor.
- Only GET and POST endpoints were created for credit card. You cannot update a credit card, only create new credit cards.
- Only GET endpoint were created for credit card tokens. If you're going to create a credit card token, it needs to be passed when creating the credit card.

Bug List

The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-17087	Updated the Shipment confirmation cron to have more execution time.
BUG-17086	Updated Order Manager so that when changing a shipping contact for an order it will recalculate shipping tax.
BUG-17081	Fixed issue with POS session logins.
BUG-17080	Updated SOI Customer Information to have the list of customers in the correct location.
BUG-17079	Fixed issue with not being able to reauthorize declined orders from club deliveries.
BUG-17078	Fixed issue with image displaying on Time Clock location selection window.
BUG-17062	Updated Cube Packing Method algorithm so that it always uses the smaller volumes first before using the bigger volumes.
BUG-17055	Fixed issue with Connect POS open/close window displaying erroneous Total value.
BUG-17050	Fixed issue with Transfer Sublocations 404 error.
BUG-17047	Updated order creation so that the order item deals are set on the order item and are created with the order item.
BUG-17034	Fixed issue with the escape order comments section (Order Manager > Order Items > 'Customer Comments and Questions') so that it doesn't try to render any scripts that are put in it.
BUG-17028	Updated the Customer Manager > Account > Credit Cards section so that if the customer has more than 100 credit cards, it only loads the last 100. Also updated getting credit cards (in places like the Order Manager) to only get the last 100.
BUG-17019	Updated 'Create From Live' button so that it correctly sets the search engine.
