Product:	CORESense Application Software
Release Number:	Versions 5.15, 7.4 and higher
Release Dates:	Beta: March 10, 2015 Release Candidate: March 24, 2015 General: April 28, 2015
Customer Support:	support@coresense.com

What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

Enhancement: PD-984: **CORESense Product Reviews**

Version: 7.4

System Path: Website

Description: CORESense Product Reviews is our in-house product review tool that provides customers an opportunity to submit website product feedback. The functionality includes entering product reviews, displaying the reviews on the product detail page, displaying the average rating on product listings and detail pages, and customized review templates. The reviews are rendered as part of the page content, which provides SEO benefits that are not available from other comparable tools. Initial Setup and Application fees apply. This is currently in a pilot program with specific clients. Additional information will be provided once pilot is complete.

Enhancement: PS-3753: **Cash Accounting Financial Report Update**

Version: 7.4

System Path: Financial Reports

Description: The financial reporting for CASH accounting ONLY has been updated as follows:

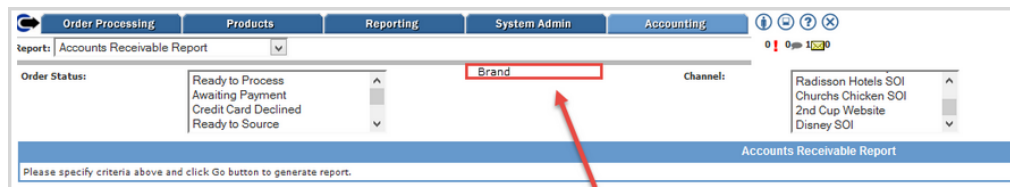

- Orders will continue to be recognized at the time of initial payment.
- If a situation is encountered that requires order recalculation, a new process has been added to determine the delta between the old and new states.
- Based on this delta, new accounting_summary and accounting_summary_item rows are created with appropriate positive or negative amounts.
- No existing accounting_summary or accounting_summary_item rows will be deleted or changed.

Enhancement: PS-3771: **Accounts Receivable Report Update**

Version: 7.4

System Path: Accounting > Accounts Receivable Report

Description: Added a Brand filter to the Accounts Receivable Report. When a brand is selected, only channels associated with that brand (or with no brand) are displayed.

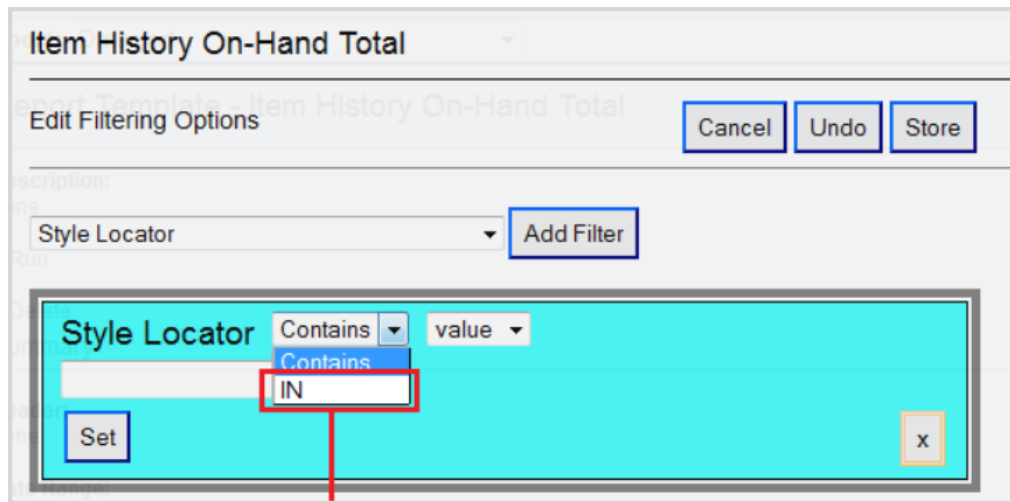

Enhancement: PS-3779: **Datamart Filters**

Version: 7.4

System Path: Datamart

Description: Added the ability to filter a report by multiple product IDs or Style Numbers by use of an "In" operator in the Datamart.

Enhancement: PS-3783: **eBay Category Name**

Version: 7.4

System Path: Products > Channels > eBay

Description: Updated the eBay product channel settings so that the eBay category and store category name now display next to the input fields.

Enhancement: PS-3793: **Connect POS Receipt**

Version: 7.4

System Path: Connect POS

Description: Added shipping information on the Connect POS receipt that includes customer name, shipping address, shipping method, and shipment cost for delivery orders.

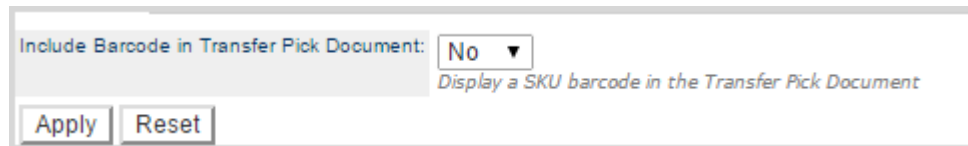

Enhancement: PS-3795: Transfer Pick/Pack Update

Version: 7.4

System Path: System Settings > Products/Labels

Description: Added a system setting to Products/Labels > Labels, entitled "Include Barcode in Transfer Pick Document." If set to YES, then a column is inserted into the Transfer Pick/Pack detail section, to the right of SKU Label, labeled "Barcode."

If barcode is populated for the SKU, the Barcode column includes an image of the barcode with the text value beneath it.

Enhancement: PS-3797: Default Wish List

Version: 5.15, 7.4

System Path: System Settings > Channels > Website

Description: Added a system setting to Channels > Website, entitled "Create Default Wish List Upon Web Customer Creation." If this feature is enabled, a default wish list will be created upon customer creation either from checkout or the create account page. The customer can access the default wish list right away.

Note: The Add to Wish List plug-in must be currently active on the website to enable this feature or an error will be thrown.

Check the **Enable** box and enter a label for the default wish list.

Enable	Channel	Wish List Name	Public
<input type="checkbox"/>	web1	<input type="text"/>	<input type="checkbox"/>
<input type="checkbox"/>	web2	<input type="text"/>	<input type="checkbox"/>
<input type="checkbox"/>	web3	<input type="text"/>	<input type="checkbox"/>

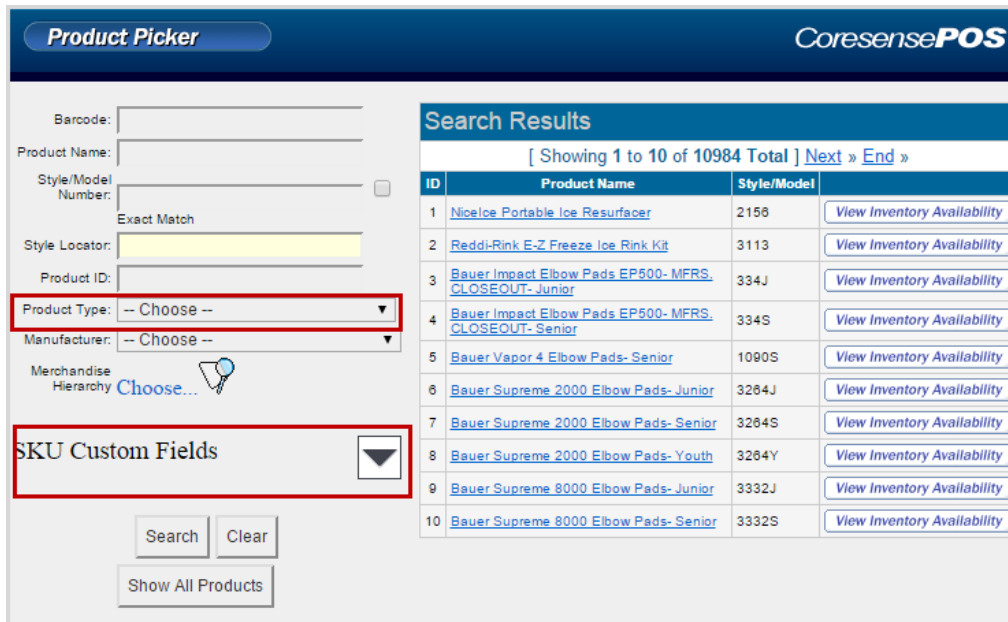

Enhancement: PS-3798: POS Product Picker

Version: Legacy and Connect POS

System Path: POS > Product Picker

Description: Added additional product search filters for Product Type and SKU Custom Fields to the POS Product Picker.

- Product Type - returns product results matching product type selected
- SKU Custom Fields - a section with accordion action rolled up by default, lists all SKU Custom Fields:
 - Section is hidden if no SKU Custom Fields are defined
 - Returns products with associated SKU(s) matching the filter criteria

Enhancement: PS-3801: eWallet Credit Card Display

Version: 7.4

System Path: Website

Description: Enhanced the eWallet functionality so that if more than one entry exists for the same credit card, both entries do NOT display in the checkout drop-down credit card list. Only distinct cards are displayed.

Enhancement: PS-3806: eWallet Credit Card Save Option

Version: 7.4

System Path: Website

Description: Enhanced the eWallet functionality so that the customer has the option to not save their credit card to the My Account screen. Added two options in the in the eWallet plug-in:

1. user_saved_card option = enables option to save card to My Account

New Plug-in: EWallet Listing Plugin

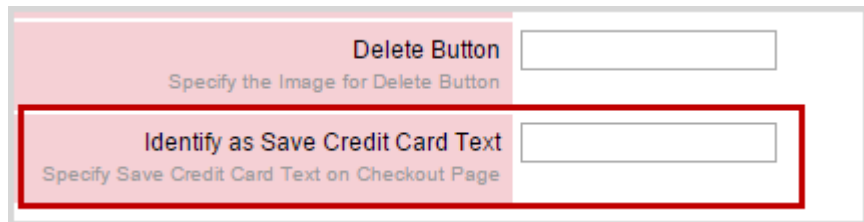

*Plug-in Tag Name:

*Credit Cards Display: (dropdown menu)

Select the dropdown to specify which credit card records to display

ACRND BURGUNDY	ACRND BURGUNDY	Action - 1/2 Round	1	Warehouse
BGAC1 BLACK	BGAC1 BLACK	Action Glove - Individual	12	Warehouse
			21	

Enhancement: PS-3823: Datamart Transaction Cube

Version: 7.4

System Path: Datamart

Description: Added Deal Manager information to the Transaction cube for easier referencing against sales data. Added an “In” function to the Order Number filter in addition to the number based functions (=, <, >, etc.) that are currently available. The additional field level filters include: COGS, Item Deal Name, Item Coupon Code, Order Coupon Code, Shipping Coupon Codes.

Select fields for inclusion in this report. Cancel Undo Store

Clicking on field names will provide definitions.

Enhancement: PS-3824: Loyalty Barcode in Return Wizard

Version: 7.4

System Path: Return Wizard

Description: Added Loyalty barcode as a filter option in the customer picker in the Return Wizard when processing returns with no originating order. Also changed the "Customer Number" label to "Customer ID" in the picker for consistency with the POS screen.

Enhancement: SS-1445: Inventory Manager Label

Version: 7.4

System Path: Inventory Manager

Description: Removed the '\$' character in the Inventory Manager - Filter by In PO information since the filter represents quantity, not cost.
