

January 2017 Product Release Information

Product:	CORESense Application Software
Release Number:	Versions 5.15, 7.4 and higher
Release Dates:	Beta Release Date: June 6, 2017 Current Release Type: Beta 2(Stay Thirsty) General Release: August 1, 2017
Also Includes Items from Release(s):	Beta 1, RC 1

What's New?

Following is a summary of the bug fixes for this software release. Unless you requested to be a Release Candidate, the fixes listed below are not available until the General Release date noted above.

Enhancement: **SS-2167: Add Field to Data Feed**

Version: 7.4

System Path: Data Feed Manager

Description: Added the 'Replenishment Cost' field to the order item information export data feed.

Enhancement: **PS-4868: Default Fulfillment Method in Datamart**

Version: 7.4

System Path: Datamart

Description: Updated filter definition so that it's a selector instead of a text box for the "Default Fulfillment Method" field and a filter in the Inventory Cube of the Datamart.

Enhancement: **PS-4840: Magento Specific Warehouse**

Version: 7.4

System Path: Magento

Description: Updated the Magento integration to allow a limited set of warehouses to be used for inventory levels and fulfillment.

Enhancement: **PS-4835: Customer Phone Number Format**

Version: 7.4

System Path: Back Office Database

Description: Changed the phone number entity so that all phone number are stored in the database with the format #####, but are displayed using the (###) ###-#### format.

Enhancement: **PS-4783: HTTPS-Only Website**

Version: 5.15, 7.4

System Path: Website

Description: Updated website option to support HTTPONLY when set as such. The Back Office and website now support browser-based encryption and decryption.

Enhancement: **PD-1465: Reset Amazon Feeds**

Version: 7.4

System Path: Amazon

Description: Added new Support tool to provide the ability to reset a single product's or all products' associated stamp for a particular Amazon feed.

Enhancement: **PD-1463: Image Generation**

Version: 7.4

System Path: Back Office Backend

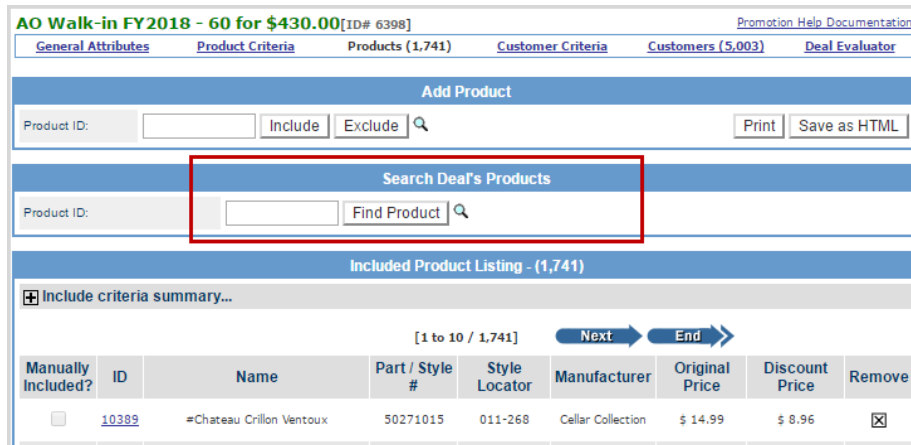

Description: Updated the Image Generation Tool to be a background process. This will prevent it from disrupting the use of the back office while it's updating images.

Enhancement: PD-1464: Deal Manager Search Option

Version: 7.4

System Path: Deal Manager

Description: Added a new section (Search Deal's Products) to the Product and Customer tabs of the Deal Manager so that it's easier to identify a product or customer within a deal's product list without having to arrow through the pagination.

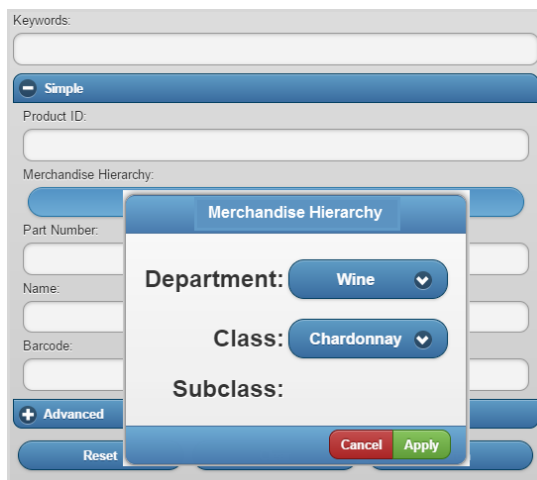

Enhancement: PD-1400: Connect POS Merchandise Hierarchy Search

Version: 7.4

System Path: Connect POS

Description: Update the Connect POS product search so that users can select from the merchandise hierarchy using a drop-down list.

Enhancement: PD-1394: **Connect POS Category Navigation**

Version: 7.4

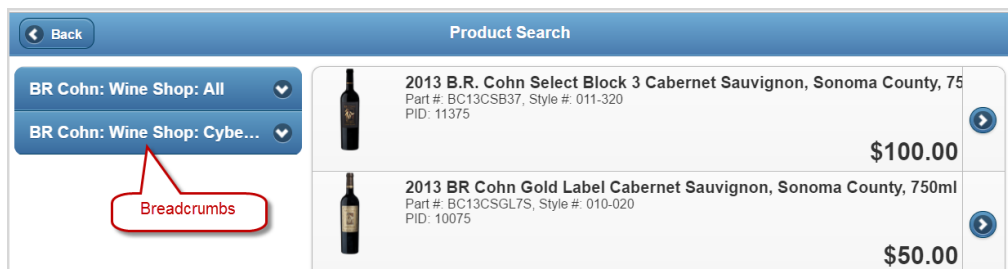

System Path: Connect POS

Description: Added product category navigation and search to Connect POS.

- A "Category Search" button has been added to the Product button on the main cart page. Dependent on the setting of the `rootCategory` pos_terminal_setting (enter category ID), selecting this button will show a list of categories that are children of the selected category.

- Selecting a child category will refresh the screen to show children of that child.
- A breadcrumb selector has been added at the top of the page. If you drill down deep enough to get to a category that no longer has subcategories, the screen will transition to the product search, and show products in that category. From here, products may be added to the cart as normal.

Enhancement: PD-1397: **Connect POS Returns**

Version: 7.4

System Path: Connect POS

Description: Update the Connect POS return process to allow the returned-to customer option to be changed or created during the return process.

Bug List

IMPORTANT: The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-14695	Fixed issue in the SOI when searching for a customer so that it uses search criteria, and only display those results allowing accurate pagination with the Next button.
BUG-14692	Fixed Connect POS barcode scanning issue that was not reading scans appropriately.
BUG-14690	Corrected search issue by shipping contact phone number in the SOI.
BUG-14687	Fixed issue with VISA and MasterCard returning invalid AVS messages.
BUG-14686	Updated the 'Update Shipments and Print Documents' button/process in the Shipment Manager to have a 5 second pause when generating the documents.
BUG-14684	Fixed 5.15 PayPal issue where coupon discounts were not being displayed on PayPal checkout screen.
BUG-14682	Updated the text version of the order_items tag to format correctly so PO template prints accurately.
BUG-14681	Fixed issue with double grouping of New Checkout plug-ins in the Website Template Manager plug-in tab.
BUG-14680	Fixed issue with PO Builder > Product Picker > Search by Vendor producing no Search Results.
BUG-14678	Fixed issue with Magento orders that are imported with only credit authorization failing and being assigned the CCC Exception status.
BUG-14674	Corrected issue with missing pagination navigation in Deal Manager when multiple pages exist.
BUG-14671	Fixed issue with blank delivery dates displaying an erroneous date.
BUG-14670	Fixed issue with Orders Exception report so that it only displays orders with exceptions.
BUG-14667	Fixed issue with Assigned Not Shipped orders no longer populating under the Inventory Manager.
BUG-14661	Updated the 'Batch Options' part of the Order Manager to check if the status chosen is blank (which is the Choose option) and to put in an additional warning if so; it will not allow you to set orders to a blank order status.

BUG-14659	Corrected Classic POS issue around the display and reporting of "Change Due."
BUG-14658	Fixed issue with the results per page options in the Inventory Manager not displaying all when "All" is selected.
BUG-14657	Updated Authorize.Net setup so that regardless of which channel is assigned, the customer phone number information is sent to payment processor.
BUG-14655	Fixed issue with saved reports not exporting all report columns.
BUG-14654	Fixed issue with Shipworks shipments not being able to download.
BUG-14653	Fixed issue with the results total in Inventory Manager is not showing a correct amount when we search for backordered items.
BUG-14651	Fixed issue with exclusive deals not being recognized when items are added to a website cart after the deals have already been applied to the cart.
BUG-14650	Fixed issue with the vendor export not showing multiple vendor ids for a SKU and then the corresponding import failed because it was trying to insert multiple rows.
BUG-14648	Added a new selection to the credit card drop-down list for Club Memberships that is 'Other Payment', where clients can select this if a customer didn't pay with a credit card.
BUG-14646	Corrected issue with how deals are managed when using the start/end date options so that they aren't applied beyond those parameters.
BUG-14644	Fixed issue with product updates in Amazon General Attributes.
BUG-14634	Fixed issue with gift receipt printing error.
BUG-14632	Updated Financials > Promotions report so that Grouping of 'Promotions Ids' looks at both order/shipping level deals and order item level deals.
BUG-14631	Fixed issue with Time Clock Manager so that when new time cards are created for an employee that the system looks at the most recent record for that user and correctly cites user as clocked in or out.
BUG-14624	Updated the arrows in the Transfer Builder > Confirmation screen to be smarter about going over each picked location and not going over the transfer/source quantity amount, as the situation demands it. Also updated the color purple to be 'Overage, new inventory will be created AND/OR more inventory will be assigned to transfer', and it will now indicate whether you've gone over for the transfer AND/OR for a single location.
BUG-14610	Fixed issue with scheduled data feeds not running correctly.
BUG-14608	Fixed issue with Customer Manager search on customer groups when None was selected and no results displayed.
BUG-14592	Fixed issue with Channel Advisor shipment confirmation feed not being received so orders were not closing.
BUG-14591	Updated Promotions report so that the system uses either the SUM or not depending on whether the Order Number field is selected.
BUG-14580	Fixed issue with Product Performance report not displaying information by product type.
BUG-14577	Fixed issue with Inventory Manager field search on Manufacturer Part Number.
BUG-14573	Updated the 'Maximum Weight' input box to allow over 1000 lbs. in the Shipping > Boxes screen.
BUG-14566	Fixed issue with default Liftgate Required field not defaulting to NO.
BUG-14553	Fixed issue with Barcode printing option when changing value in quantity field to update quantity accurately when the "Update Batch QTY" button is clicked.

BUG-14525	Fixed issue with Open Layaways report not working.
BUG-14513	Fixed issue with SOI Order Confirmation not accurately displaying line item adjustments.
BUG-14499	Fixed alignment of Returns Report so totals display in the correct columns.
BUG-14496	Fixed issue with so that Pre Order clubs addresses are not deleted (reset) whenever there is an update to that same address in the Customer Information profile.
BUG-14486	Fixed issue with Connect POS returns with no originating order that were not including sales tax on the return. The client must set a default destination warehouse for the channel they're returning on; once doing so, it will use that chosen warehouse for the state and zip for sales tax calculation.
BUG-14421	Updated Magento Order Creation to add an error to the order if the payment method isn't mapped and not prevent the order from being created.
BUG-14414	Updated the handling of Magento Payment and Shipping Methods to separate them per instance.
BUG-14386	Fixed issue with out of stock configurations showing as in stock on the website.
BUG-14056	Updated the Google Variance Feed to check each configuration's associated SKU before including it in the feed.
BUG-13649	Fixed issue with Connect POS not displaying results when searching orders by Shipping Address Last Name.
