Also Includes Items from Release(s):	Beta 1

What's New?

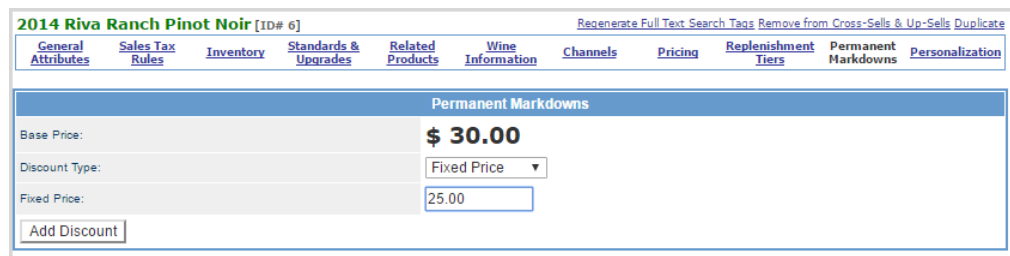

Following is a summary of the bug fixes for this software release. Unless you requested to be a Release Candidate, the fixes listed below are not available until the General Release date noted above.

Enhancement: **PS-4862: Fixed Price Permanent Markdown**

Version: 7.4

System Path: Product Manager > Permanent Markdown

Description: Added the ability to specify the actual price for the permanent markdown amount instead of having to do a percentage or dollar amount discount.

Permanent Markdowns

Base Price: **\$ 30.00**

Discount Type: Fixed Price ▼

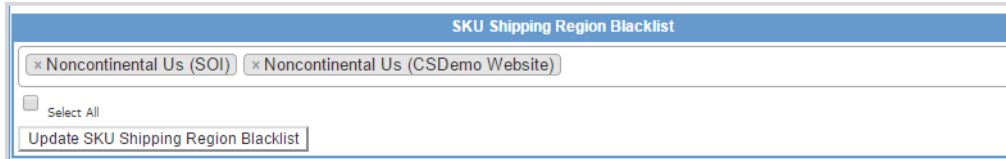

Fixed Price: 25.00

Enhancement: PS-4832: **Blacklist SKUs From Shipping Regions**

Version: 7.4

System Path: Inventory Manager > Shipping

Description: Added the ability to blacklist SKUs from being shipped to specific shipping regions (Inventory Manager > Shipping) and update shipping method cost calculation to not return a shipping method if a SKU is blacklisted for that region / shipping method combination.

Enhancement: PS-4831: **New Subtotal SKU Shipping Driver**

Version: 7.4

System Path: Inventory Manager > Shipping

Description: Added a new SKU Shipping Driver of "Subtotal," which will utilize the existing SKU Shipping Driver infrastructure, and allow cost calculation to be determined based on the subtotal of the items that have SKUs marked as "Subtotal" for their SKU Shipping Driver.

Enhancement: PD-1440: **Connect POS IHA Gaps**

Version: 7.4

System Path: Connect POS

Description: Updated the IHA functionality for Connect POS in the following areas.

- IHA Override
- Customer acceptance of terms and conditions with signature for the Ingenico.
- Automatic apply of the IHA payment when Checkout is selected.
- Ability to search both IHA and non-IHA products if IHA override is setup.
- Verification of IHA department limits.
- Accurate barcode scanning of IHA participating products.
- Adding new customer to system with IHA assignment and continue with IHA or regular order.
- IHA returns to display only IHA or Payroll Deduction payment types and apply IHA type automatically to return.

Bug List

IMPORTANT: The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-14643	Fixed an issue with Pricing Groups that was introduced with Query Builder Update changes.
BUG-14642	Fixed issue with PO number search field in the PO Manager.
BUG-14640	Corrected issue with Transfer closures when system is managing dispositions. If that's not needed, it tries to close normally, which wasn't setup correctly.
BUG-14639	Fixed issue with BOGO deal where deal was being dropped from Connect POS based on BUY and GET calculations not being applied correctly.
BUG-14637	Fixed issue with Classic POS not allowing product searches using manufacturer and show all products options.
BUG-14629	Fixed issue with Classic POS not applying sales tax to returns that do not have an originating order. Only affects returns with no originating order that need to match by the sales tax state vs. specifically by zip code.
BUG-14628	Fixed Data Feed Manager import functions so it can import files in to the queue from a local location.
BUG-14623	Corrected issue with incorrect time zone being displayed in Back Office based on server location instead of Connect POS time zone.
BUG-14619	Fixed display issue of SOI products and customers pre-populating in the Order Items > Products tab and Customer Information, respectively, so user can select directly from the list without having to perform a search.

BUG-14617	Fixed issue in 5.15 that was preventing products from being initiated to a channel from within the Product Manager.
BUG-14613	Fixed issue with Connect POS exchanges not printing two receipts, one for the new sale and a second for the return.
BUG-14582	Corrected issue with barcode scanning when receiving POs.
BUG-14570	Fixed issue with being able to activate a product on multiple channels from within the Product Manager > Channels.
BUG-14545	Corrected Classic POS handling of empty mandatory customer fields so that POS SQL errors are not generated.
BUG-14536	Fixed the "Product ID" and "Product Name" search fields on the Connect POS product search.
BUG-14528	Fixed issue with Accounting > Sales Report to provide more flexibility in use of filter option combinations so that results and sorting can be performed.
BUG-14487	Fixed issue with Wishlist Display so that it does not go to a white screen if trying an invalid wishlist ID.
BUG-14451	Corrected issue in Magento where inactive products were being passed from CORESense in to Magento.
BUG-14415	Fixed Magento product matching errors from CORESense to Magento orders.
BUG-14512	Fixed 504 error message on larger orders when processing through Ingenico based on the fact that the code was erasing the Ingenico screen and redrawing the entire order every time a new line was added, so as the number of line items increased, it was taking longer and longer.
