What's New?

Following is a summary of the bug fixes for this software release. Unless you requested to be a Release Candidate, the fixes listed below are not available until the General Release date noted above.

Enhancement: **PS-4834: Connect Exchange Receipts**

Version: 7.4

System Path: Connect POS

Description: Updated Connect POS Sales Receipt to print the product ID next to each order item's name. Also updated viewing the receipt from Order History to see the PID as well.

Bug List

IMPORTANT: The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-14814	Updated Connect POS returns process so that when an exchange is completed for an item where cash is due back to the customer, only the return receipt shows the cash that is to be refunded.
BUG-14813	Fixed issue with Inventory Report Builder rendering accurate results based on SKU active status.
BUG-14810	Updated BOGO deal calculation during order creation; the variable to multiple the BOGO discount amount is used across deals, including Permanent Markdowns, so that the BOGO calculation only applies to one of the two items.
BUG-14807	Fixed issue with Category Manager display of Type under the Category Products section.

BUG-14802	Updated Order Item Entity and Shopping Cart Module to remove the restriction of only be able to have a quantity of 1 for a digital product.
BUG-14801	Updated the add to cart process to attach a new order item to the shipping contact on the order, if possible, instead of a blank contact so quantities are accurate.
BUG-14796	Fixed the Connect POS oversale function so it multiplies each required sku's quantity by the item's quantity. Updated an item's quantity in the cart to change the coloring for showing oversale if oversold if the item becomes oversold. System will also return it back to regular coloring if updated again below the on hand amount.
BUG-14795	Updated Connect POS barcode scanning to be aware if item is oversold.
BUG-14794	Fixed issue with SKU Only import duplicating reorder points.
BUG-14792	Fixed issue with adding inventory transaction reason codes to the Inventory Transaction Manager.
BUG-14791	Fixed Connect POS access to Back Office so that user can close Back Office windows and return to the POS.
BUG-14790	Fixed issue with value cards, gift certificates and customer credits payments not being stored in the Datamart Payments cube.
BUG-14785	Fixed search criteria in Customer Manager to allow search by sales rep.
BUG-14783	Fixed Connect POS return process to allow returns against a Value Card.
BUG-14782	Fixed issue with product initiation for website channel causing a fatal error.
BUG-14779	Fixed issue with shipments not generating correctly when using the 'Group Shipments by Order Item' system setting.
BUG-14723	Fixed issue with Connect POS IHA Ingenico cancel signature button not closing op-up prompt.
BUG-14709	Updated Connect POS so that when Tempus is being used, it will disable the 'Debit' button during return checkout and not automatically apply a debit payment, if the originating order had a debit payment.
BUG-14704	Updated Connect POS so that Value Card scans are read correctly.
BUG-14481	Fixed issue with extra shipments being created for orders that have multiple items with various quantities.
