Release Dates:	Release Date: July 25, 2017 Current Release Type: RC 4(Stay Thirsty) General Release: August 1, 2017
Also Includes Items from Release(s):	Beta 1, RC 1, Beta 2, RC 2, RC 3

What's New?

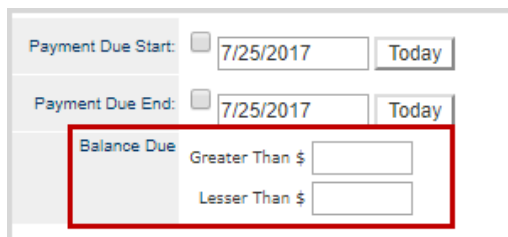

Following is a summary of the bug fixes for this software release. Unless you requested to be a Release Candidate, the fixes listed below are not available until the General Release date noted above.

Enhancement: **SS-2207: Balance Due Order Manager Filter**

Version: 7.4

System Path: Order Manager

Description: Added Balance Due filter to Order Manager with options of greater than or less than options.

Enhancement: **SS-2204: Template Smarty Tag**

Version: 7.4

System Path: Email & Document Templates Manager

Description: Added Smarty Tag to template for display of discounted shipping price. Updated the 'Shipping Options Display Plugin' code to set a new variable within the 'checkout_shipping_options-row' template that reads as:

```
<strong>{shipping_price}
{$undiscounted_shipping_price|price_format}</strong>
```

Enhancement: **SS-2195: Sales Tax Percent**

Version: 7.4

System Path: Connect POS

Description: Added display of sales tax percent to sales receipt. NOTE: This does not display for historical receipts only those that are generated with it on the original.

Enhancement: **PS-4825: Fraud Detection Enhancement**

Version: 7.4

System Path: Order Lifecycle Management > Fraud Detection

Description: Enhanced automated fraud detection by adding the following fields:

- Shipping and Billing Zip Codes Do Not Match (This setting will work similar to the existing State check for Billing and Shipping Addresses, but compare the zip code on the order billing and shipping address)
- Fraudulent City
- Fraudulent State
- Fraudulent Zip Codes
- Fraudulent Name
- Fraudulent Address
- Fraudulent Email Address

These 6 settings will allow you to specify a list of fraudulent cities, states, zip codes, name, address and email address independent of each other. If an order has a billing and / or shipping address that matches any of the criteria provided, it will be flagged as fraudulent. NOTE: Clients can add and remove items from these "bad" lists.

Enhancement: PD-1478: **Magento Product Sync Feed**

Version: 7.4

System Path: Magento Integration

Description: The Magento Product Sync has been split into two processes. Inventory on hand quantities are now pushed to Magento via the new Inventory Sync process. The Product Sync process is currently only performing Product Matching in CORESense. These product matches are then used during Order Creation.

Additionally, a new "Testing" mode has been added to the CORESense Connector, to allow a user to test the Inventory Sync feed without altering data in Magento.

Bug List

IMPORTANT: The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.
