Release Dates:	Release Date: August 8, 2017 Current Release Type: Beta 1(Thundergulch) General Release: October 31, 2017
Also Includes Items from Release(s):	None

What's New?

Following is a summary of the enhancements and new features added in this software release. Unless you requested to be a Release Candidate, the features listed below are not available until the General Release date noted above.

Enhancement: **SS-2218: PO Centralized Distribution**

Version: 7.4

System Path: Purchase Manager > Central Distribution

Description: Updated PO Centralized Distribution to:

1. No longer allow the change of the distribution center's location within the receiver and to always user the default one (affects centralized POs only).
2. Create transfers when distributing that match the distribution center, to transfer it from the distributing sub-location to the main warehouse level.

Enhancement: **SS-2145: Shipment Manager Deletions**

Version: 7.4

System Path: Shipment Manager

Description: Activated the Delete icon functionality in the Shipment Manager search results screen, which can be managed through user permissions.

Enhancement: **SS-1507: Inventory Report Builder**

Version: 7.4

System Path: Inventory Report Builder

Description: Updated Inventory Report Builder so that Sales Date Range can be a single day.

Enhancement: **PS-4920: Phone Number Tag**

Version: 7.4

System Path: Email & Document Templates

Description: Added <USER_PHONE_NUMBER> tag to the email / document template that prints current logged in Back Office user's phone number on their user account.

Enhancement: **PS-4912: Pre-Order Reserve Inventory**

Version: 7.4

System Path: Pre-Order Clubs

Description: Updated the cron that generates orders from pre-orders so that if the credit card is declined, no inventory will be reserved.

Enhancement: **PS-4911: Club Membership Display**

Version: 7.4

System Path: Club Membership

Description: Updated club returns to display two columns (Originating Channel and Processing Channel) in the Customer Manager > Orders>Returns tab.

Enhancement: **PS-4870: Awaiting Payment Automation**

Version: 7.4

System Path: Order Manager

Description: Added a new system setting (System Settings Manager > Shipping > Notification > Fully Shipped Balance Due Order Status) and updated shipping processes so that if this setting is set, and an order is being marked as fully shipped and has a balance due, it will be placed into the selected order status.

Additionally, updated the lock order process of the Order Entity so that if an order is being locked, and is not in the fully shipped order status, it will be placed into the fully shipped order status.

Enhancement: **PS-4859: PayFlow Processor**

Version: 7.4

System Path: Payment Processors

Description: Updated PayFlow payment processor to send Shipping Information to payment processor.

Enhancement: **PS-4791: Value Card Expiration**

Version: 7.4

System Path: Value Card Management

Description: Added new permission (Value Card - Set Expiration Date) and updated Value Card Manager and SOI to only allow setting / editing of value card expiration date if a user has this permission.

Enhancement: **PD-1487: Payment Processor Tokenization**

Version: 7.4

System Path: Payment Processors

Description: Updated the payment processor system to check whether the payment processor uses tokenization and, if it does, to check to see whether it allows using tokens between different payment processors of that type.

Enhancement: **PD-1485: Telephone Searches**

Version: 7.4

System Path: Payment Processors

Description: Updated code that is used across the searches in the Back Office to apply filtering to those fields that use telephone searches so that formatting doesn't hinder the search results.

Enhancement: **PD-1476: Connect POS Credit Card Entry**

Version: 7.4

System Path: Connect POS

Description: Upgraded the manual credit card entry for expiration month and year to use the same pop-up selects used throughout the Connect POS UI.

Enhancement: **PD-1474: Connect POS Customer Groups**

Version: 7.4

System Path: Connect POS

Description: Fixed an issue in Connect POS when adding customer groups to a customer that is not on an order.

Enhancement: **PD-1467, 1204, 1127, 1109, 1105-: Connect POS Customer Groups**

Version: 5.15, 7.4

System Path: Cross System

Description: Additional cross system conversions of functional managers to use QueryBuilders.

Bug List

The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-14907	Fixed issue with persistent cart dropping upgrade price if user adds item to cart and logs out and then back into account.
BUG-14904	Fixed issue with 5.15 reports not displaying returns.
BUG-14898	Fixed issue with Sales tax not being charged for return exchanges on Connect POS.

BUG-14895	Fixed issue with fraud detection view ability of "More Details" in the Orders > Billing tab.
BUG-14891	Fixed issues with Value cards in 5.15 SOI: Value cards created through SOI not assigning the correct card number. When using a value card for payment, it wasn't showing the list of other value cards the customer has. Not displaying the right amount on how much the chosen value card had left.
BUG-14889	Fixed issue within 5.15 for PayPal orders special packing requests not being recognized.
BUG-14886	Fixed issue with Order Exception report not generating accurate results based on order status filters.
BUG-14884	Fixed issue with SOI new customer additions generating white screen based upon customer association with specific Deal Manager promotion.
BUG-14882	Fixed issue with Classic POS query failures.
BUG-14880	Fixed issue with Accounting reports not displaying results correctly due to incorrect format of the default date.
BUG-14879	Fixed 5.15 website product sorting issue.
BUG-14876	Fixed issue with 5.15 promotional manager.
BUG-14869	Fixed issue with Website Category Manager search not filtering correctly on search terms.
BUG-14868	Fixed issue where recurring orders that had deals associated them were not receiving discounts.
BUG-14866	Fixed issue with Merchandise Hierarchy report not generating accurate data for hierarchy values.
BUG-14864	Fixed Connect POS same day return issue so that no errors display when a return occurs the same day as a sale.

BUG-14863	Updated Connect POS receipts and checkout screen to include display of last four digits of credit card.
BUG-14823	Fixed issue with Back Office website display of wishlist items that contain multiple configurations.
BUG-14822	Updated Back Office barcode printing functionality so that it is consistent and relevant to the manager in which it is used.
BUG-14821	Fixed issue with Datamart accurately updating product status once it is deactivated.
BUG-14820	Added a print pop-up to display when printing invoices from the Order Manager > Batch mode.
BUG-14819	Updated batch printing of invoices from Order Manager to include page breaks.
BUG-14812	Fixed issue with recurring orders suspend and resume functionality so that resume reactivates the order.
BUG-14809	Fixed issue with 5.15 Order Manager search results generating very slowly.
BUG-14808	Wrote cleanup processes to remove old records from the replication tracker system for Connect POS.
BUG-14805	Fixed category not clearing and category search not working accurately within the Pricing Group Manager in 5.15.
BUG-14767	Fixed issue with label generation wizard not printing the number of labels requested when printing barcodes from a receiver on a PO.
BUG-14756	Modified Back Office fields where HTML and special characters can be entered so that they aren't stored and then display on website.
BUG-14747	Updated Authorize.net parameters so that if a credit card CVV is entered incorrectly and then corrected, it won't error out.
BUG-14730	Fixed issue with Order Status not being saved in Order Manager.
BUG-14697	Updated fraud detection automation to not grab any orders created in the last minute. The order will go through the automation scripts at the next time interval.
BUG-14687	Fixed issue with Tempus payment processor sending erroneous AVS message for VISA and MasterCard.
BUG-14652	Fixed issue when using quantity with the "scan" button on Connect POS not displaying the correct amount on the Ingenico machine.
