Release Number:	Versions 5.15, 7.4 and higher
Release Dates:	Release Date: August 29, 2017 Current Release Type: RC 1(Thundergulch) General Release: October 31, 2017
Also Includes Items from Release(s):	Beta 1

What's New?

Following is a summary of the bug fixes for this software release. Unless you requested to be a Release Candidate, the fixes listed below are not available until the General Release date noted above.

Enhancement: **SS-2259: Connect Search by POS Number**

Version: 7.4

System Path: Connect POS

Description: Updated Connect POS to support searching by the POS order num.

Enhancement: **SS-2244: Amazon XML Error**

Version: 5.15

System Path: Amazon

Description: Fixed Amazon XML mapping error for 5.15.

Enhancement: PS-4906: **SixBit API**

Version: 7.4

System Path: Channels

Description: Added an integration with SixBit API via the following crons:

- Inventory_ReconcileTo
- Sends inventory available to SixBit for SKUs of products active on the SixBit channel. Order_List
- Sends a request to SixBit to generate an XML file containing a list of orders created and paid Order Import
- Processes file(s) generated by the Order_List API call and creates orders in CORESense Shipment_Update
- Generates an XML file containing SixBit Shipments to be updated with tracking numbers and shipped dates. This is for SixBit Orders in CORESense that have been fully shipped.

Bug List

IMPORTANT: The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
