What's New?

Following is a summary of the bug fixes for this software release. Unless you requested to be a Release Candidate, the fixes listed below are not available until the General Release date noted above.

Enhancement: **SS-2292: Inventory Adjustment in Search Results**

Version: 7.4

System Path: Inventory Manager

Description: Added the ability to manage inventory adjustments using the [+] [-] (add / remove) buttons in the Inventory Manager Search Results page and the Inventory Manager > Inventory Levels tab when Warehouse sub-locations are enabled.

Enhancement: **PD-1525: Transactional Email for Product Reviews**

Version: 7.4

System Path: Website

Description: Added the capability to have a follow-up email sent to customer after their order has shipped to have them write a review. To set this up, you will need to do the following:

1. Create an email template you would like to have sent using the Email / Document Template Manager. You can use the following tag (<smarty template='product_review_followup_products'>) in this template to display items to be reviewed with links. If you would like to make changes to the formatting of this template, you can do so by creating a new entry in the Document Templates table by using the Technical Configuration Manager and copying the contents from the product_review_followup_products.
2. Create entry in the Product Review Followup Templates table using the Technical Configuration Manager.

Enhancement: PD-1523: **Authorize.Net Log Transactions**

Version: 7.4

System Path: Authorize.Net Payment Processor

Description: Added the ability to turn on/off transaction logging of Authorize.net transactions and added code to scrub card numbers from logging.
