

## Fall 2017 Product Release Information

<b>Product:</b>	<b>CORESense Application Software</b>
<b>Release Number:</b>	Versions 5.15, 7.4 and higher
<b>Release Dates:</b>	Release Date: November 14, 2017 <b>Current Release Type: RC 1(Whirlaway)</b> General Release: January 23, 2018
<b>Also Includes Items from Release(s):</b>	NA

## What's New?

Following is a summary of the bug fixes for this software release. Unless you requested to be a Release Candidate, the fixes listed below are not available until the General Release date noted above.

**Enhancement:**      **PS-4978: UPS Worldship Export Updates**

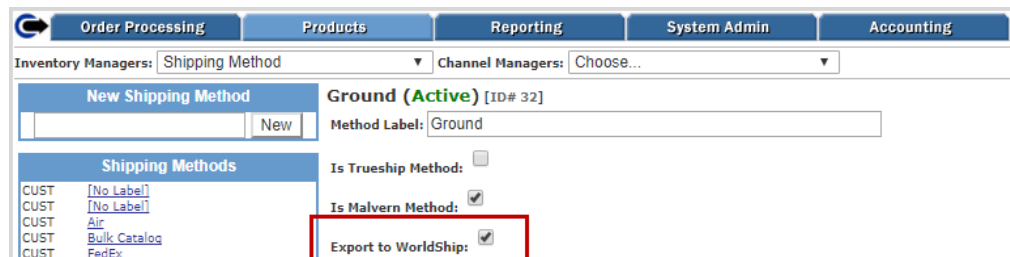

**Version:**            7.4

**System Path:**      Shipping Methods Manager

**Description:**      Added the following information available to UPS Worldship Export:

- Brand Id (ups\_worldship\_export\_order\_info)
- Carrier (ups\_worldship\_export\_shipments)
- Order Shipping Detail Id (ups\_worldship\_export\_shipments)

Added the ability to export non-UPS type shipments to UPS Worldship. There is now a flag (Export to Worldship) on the Shipping Method that controls whether or not the shipment should be exported to Worldship.

**Enhancement:**      **PD-1542: Product Review Pagination**

**Version:**            7.4

**System Path:**      Plug-ins > Product Reviews

**Description:**      Add an ajax target to update the pagination of the product review plug-in.

**Enhancement:** PS-4955: Order Manager Display of Personalizations

**Version:** 7.4

**System Path:** Order Manager

**Description:** Updated Order Items tab of Order Manager to display personalization information, as well as the <SHIPMENT\_STATUS> html email template tag.

### Bug List

**IMPORTANT:** The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-15246	Updated the Order Manager code for "apply coupons" to only skip the deal for further order items if the deal is an Order Free Gift (which shares code with the Promotional Discount).
BUG-15245	Fixed issue with FedEx RateRequest functionality.
BUG-15243	Fixed an issue with the warehouse sublocation import where the wrong parent was assigned if not all locations of the same type had a child (i.e., Shelf A, B, C don't have children, but Shelf D does).
BUG-15235	Fixed issue with printing barcodes from the Transfer Manager receiver.
BUG-15230	Made Pre-Order changes so that you cannot delete a contact from the Customer Manager addresses tab if it is the pre-order shipping contact, and if a pre-order shipping contact is inactive, it will still show as selected in the preorders tab of the Customer Manager.
BUG-15229	Fixed issue with website out of stock messaging displaying correctly.
BUG-15227	Fixed issue with SOI split order items not accurately reflecting price adjustments once split functionality was used.
BUG-15225	Updated calendar css to use new secure images.
BUG-15218	Fixed the Label Generation Wizard to once again sort by barcode.
BUG-15217	Fixed issue with 5.15 ability to leverage Wishlist based on http versus https format.

BUG-15215	Updated Connect POS code to, when removing an item from your cart, to revert 'focus' back to barcode scanning input.
BUG-15212	Updated Customer Manger > Club Membership to allow updates to customer addresses.
BUG-15211	Updated 5.15 to be like 7.4 and only use the user(name) field for salesman.
BUG-15210	Update Connect POS to allow an increase in the drawer amount by more than what the initial opening drawer count was.
BUG-15208	Updated Connect POS Orders to start using the 'Enable Loyalty Summary on POS Receipts' setting.
BUG-15206	Fixed SOI issue that was limiting the number of ship to splits within a single order.
BUG-15205	Updated POS Replication Manager so query for last order date was more efficient and the sorting is done by type first.
BUG-15200	Fixed issue with Best Sellers Category Auto-Populate not populating all products after nightly cron ran.
BUG-15199	Fixed issue with 5.15 Order Manager field not displaying correctly.
BUG-15198	Added a wishlist SESSION variable in ajax add_to_cart_base so that a record is written to wishlist_order_item table when a product is purchased from a wish list.
BUG-15196	Fixed issue with 5.15 Classic POS not applying credit card payment to orders.
BUG-15195	Fixed issue with 5.15 deal calculations not working correctly.
BUG-15193	Fixed issue with Image Generation Tool running in-browser for all products.
BUG-15192	Fixed issue with Connect and Classic POS comments not displaying on daily reports.
BUG-15190	Fixed issue with Commission Manager not saving updated rate entries.
BUG-15189	Fixed issue with Connect POS opening drawer speeds.
BUG-15186	Fixed 5.15 website template manager projects not displaying in project drop-down list.
BUG-15185	Fixed issue with Order Manager > Shipping tab > Delayed Delivery date not being saved.
BUG-15184	Added code to Connect POS that will prevent the return from pre-populating the credit card payment from the originating order on the return checkout screen if the original payment doesn't have a credit card id.
BUG-15180	Fixed issue with order item sales tax calculation that was impacting order balances.

BUG-15178	Fixed issue with Deal Manager search by channel not rendering any results.
BUG-15173	Fixed issue with Sales Report Builder not maintaining criteria when running saved reports.
BUG-15171	Updated SOI to always apply the personalization if it's blank AND required, so that the error code can catch that it's required and blank. Continues to not add it if it's not required AND blank.
BUG-15163	Fixed issue with Google showing CORESense as having all of the links to client sites.
