

Fall 2017 Product Release Information

Product:	CORESense Application Software
Release Number:	Versions 5.15, 7.4 and higher
Release Dates:	Release Date: December 5, 2017 Current Release Type: RC 2(Whirlaway) General Release: January 23, 2018
Also Includes Items from Release(s):	RC1

What's New?

Following is a summary of the bug fixes for this software release. Unless you requested to be a Release Candidate, the fixes listed below are not available until the General Release date noted above.

Enhancement: **SS-2331: Inventory Transaction Report Display**

Version: 7.4

System Path: Inventory Manager > Transactions

Description: Fixed issue with Inventory Transaction report results not displaying full list of transactions without having to use scrolling.

Enhancement: **PS-4989: PO Template Tag**

Version: 7.4

System Path: Email & Documents Template Manager

Description: Added a new Purchase Order Template tag for purchase_order.label available within the email and document templates.

Enhancement: **PS-4944: Financial Data Feeds Field**

Version: 7.4

System Path: Data Feeds

Description: Added inventory_id field to Order Item Info Export and Shipment Export. Updated the code to check if the inventory_id field is in the results, as the grouping and values for certain fields differs is it is included.

Enhancement: PD-1551: Update FedEx Service URLs

Version: 7.4, 5.15

System Path: FedEx

Description: Updated FedEx Service URLs per FedEx request. FedEx is implementing the best practices in the new platform for FedEx Web Services WSDLs. The new platform follows a servlet-based approach which requires customers to use standard URLs to route the requests correctly.

Enhancement: PD-1399: Connect POS On Account Function

Version: 7.4

System Path: Connect POS

Description: Added the On Account functionality as a payment method for Connect POS.

Bug List

IMPORTANT: The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-15288	Updated display of personalizations in Order Manager to utilize the 'Personalizations Display' system setting so that duplicate display of personalizations does not occur.
BUG-15287	Updated purchase order create() method so that smarty templates contained in the document are processed.
BUG-15283	Updated the sanitization code to look at any variation of 'FullText' and not specifically for the word 'FullText'.
BUG-15281	Updated kit fulfillment to check to see if the reason that it's not available is because it is already assigned inventory for that SKU and to not unset the warehouse if there is assigned inventory. Updated is_fully_shipped functionality to take into account the product not having all its SKUs assigned.

BUG-15275	Updated the Connect POS so that when applying a new loyalty card, any associated deals can be applied to new loyalty members.
BUG-15266	Updated the code to render custom fields within the Email & Document templates.
BUG-15265	Fixed issue with Deal Manager not updating product list when adding products to the exclude list.
BUG-15263	Fixed issue with slow running Listrak data feeds.
BUG-15258	Fixed issue with Connect POS "clear" function not working when using Simple search.
BUG-15257	Fixed issue with Inventory Manager search results pagination not working when using merchandise hierarchy criteria.
BUG-15256	Fixed issue with Shipment Manager Date Parameters not being maintained after updating shipments.
BUG-15254	Updated Connect POS to include sales rep name on Adjustments report.
BUG-15241	Fixed issue with 5.15 returns not displaying return data accurately.
