

Fall 2017 Product Release Information

Product:	CORESense Application Software
Release Number:	Versions 5.15, 7.4 and higher
Release Dates:	Release Date: January 16, 2018 Current Release Type: RC 3(Whirlaway) General Release: January 23, 2018
Also Includes Items from Release(s):	RC1

What's New?

Following is a summary of the bug fixes for this software release. Unless you requested to be a Release Candidate, the fixes listed below are not available until the General Release date noted above.

Enhancement: **SS-2349: Inventory Availability Threshold to 5.15**

Version: 5.15

System Path: Amazon Feeds

Description: Provide the ability to provide an inventory threshold (percentage or flat limit) for Amazon.

Enhancement: **SS-2346: Duplicate Product Doesn't Copy Faceted Filter Profiles**

Version: 7.4

System Path: Faceted Filters

Description: Added capability that when duplicating a product, the faceted filter profiles copy to the new duplicate product.

Enhancement: **SS-2345: Delete Faceted Filter Profile From Product**

Version: 7.4

System Path: Faceted Filters

Description: Added delete functionality to Product Filter Profiles section.

Enhancement: **SS-4990: Purchase Order Cost Field**

Version: 7.4

System Path: PO Manager

Description: Added cost_method as field available within product / sku import mapping under purchase order entity. If a value is provided in this field ('wholesale','discounted','replenishment'), it will be used as the cost method, otherwise, it will use the vendor or system setting defined cost method.

Bug List

IMPORTANT: The bug list is intended for reference only. In an effort to prevent any potential self-misdiagnosis, if you think that you have experienced a cited issue, please contact Support Team to verify. Although a listed bug might sound similar to your situation, it is best to confirm it.

Bug #	Description
BUG-15351	Updated the checkout module (where the 'Orders with recurring items must be paid for by credit card.') to go through the 'recurring_order_schedule' session object to make sure at least one of them is set before giving an error.
BUG-15346	Fixed issue with sales tax not being calculated accurately.
BUG-15341	Updated the Connect POS 'Close Register' screen to set each of the '-' and '+' buttons to have a html type of 'button', because otherwise the browser treats the buttons as submission buttons and tries to 'submit' them when pressing enter.
BUG-15340	Updated Ingenico devices to update when doing adjustments and tax exemptions.
BUG-15339	Updated the Connect POS 'Reprint Last Receipt' functionality to check if the receipt was part of an exchange and, if so, to print the last 2 receipts.
BUG-15336	Updated the display of the Datamart to escape the report data so that it wouldn't be a problem to have data with apostrophes in them.
BUG-15333	Updated the faceted filtering code to show the tab if the product has profiles OR the module is enabled.
BUG-15332	Updated the 'Add Incentive' code for SKU incentives to specifically check the string length of the description after trimming it to determine whether it's empty.
BUG-15329	Updated Connect POS Product Keyword and other searching to filter out inactive products.
BUG-15328	Fixed issue when searching for products on Connect POS in Firefox, the "Click or pull up for next" pagination is now visible, so a user is able to see more results.

BUG-15326	Fixed issue with Personalization Value Group Manager not allowing the addition of a new value.
BUG-15325	Fixed issue with Personalization Template Manager is not rendering any values within the 'Personalizations' section.
BUG-15324	Fixed issue with Personalization conversion SQL failing.
BUG-15321	Fixed issue with Classic POS not reprinting orders with value cards.
BUG-15320	Updated the Transfer Manager code to not allow confirmation if the transfer is in a status of 'In Transit', 'Closed' or 'Void'.
BUG-15319	Updated the main image in the Product Manager to no longer force a height so images aren't distorted.
BUG-15316	Fixed issue using On Account with Connect POS, so that the available balance rendered in Checkout takes into account open orders.
BUG-15314	Fixed issue with Return Wizard to Connect POS. When the return is being calculated, if there is a positive penny difference in the total, it subtracts a penny.
BUG-15313	Fixed issue with Import Tool upgrade options importing incorrectly.
BUG-15311	Fixed issue with Faceted Filter Profile Manager 404 Error.
BUG-15306	Fixed issue with inventory being fulfilled by automation but not assigned to a shipment.
BUG-15303	Fixed issue with Inventory Manager Search Results > Assigned Not Shipped (per warehouse) not displaying correctly.
BUG-15302	Updated website deal calculation to add the beginning of recalculating promotions and to clear the order item side of promotions as well as the order side (if certain conditions are met).
BUG-15301	Fixed issue with failed Web Customer Password search returning all records.
BUG-15297	Fixed searching issue for an In Stock quantity in the Inventory Manager (and potentially the SKU Picker) is joining in the models table unnecessarily.
BUG-15296	Fixed issue with recurring order function that was applying discount prior to customer selecting auto delivery.
BUG-15295	Fixed issue with Connect POS where the advanced search for Manufacturer wasn't working.
BUG-15279	Fixed issue with Purchase Order Import not recognizing Purchasing System Settings.
