

Smarty code for displaying the Colorado Retail Delivery fee

```
<!-- set retail delivery fee and net order adjustment variables -->
```

```
{assign var='retail_delivery_fee' value = $order->get_colorado_retail_delivery_fee()
format="%.2f}
{assign var='order_adjustment_total' value = $order->get_order_adjustment_total()
format="%.2f}
{math equation="x - y" x=$order_adjustment_total y=$retail_delivery_fee format="%.2f"
assign='net_order_adjustment_total'}
<!-- end -->
```

```
<!-- sample use in email and document template -->
```

```
if $order_adjustment_total != 0}
<tr style="text-align:right;">
<td>&nbsp;&nbsp;&nbsp;</td>
<td colspan="3" style="background-color:#EBECEEE; padding:0.6em 0.4em;">Order
Adjustments</td>
<td style="background-color:#EBECEEE; padding:0.6em
0.4em;">\${$net_order_adjustment_total}</td>
</tr>
{/if}
{if $retail_delivery_fee != 0}
<tr style="text-align:right;">
<td>&nbsp;&nbsp;&nbsp;</td>
